The new service, which includes new switchgear and transformers, will improve reliability and correct system overload issues.

The first phase of the electrical infrastructure renewal was approved by the Trustees in June 2006 for $5 million and included new service to the University Museum and Garage, Franklin Field, Hollenback Center, the Moore School and Charles Addams Hall among others.

Phase II of the project is estimated to cost $5.68 million and will be funded by an internal capital project loan. The two year project is part of the University’s overall Facilities Renewal needs.

RESOLVED, that the Campus Electrical Infrastructure Upgrade Phase II project, estimated to cost $5.68 million, be and the same hereby are approved and that the Vice President for Facilities and Real Estate Services and either the Executive Vice President or the Vice President for Finance and Treasurer be and hereby are authorized to take such actions, execute such contracts and incur such expenses and obligations – not, however, in excess of 110% of the estimated costs as presented to the Budget and Finance Committee – as may, in their judgment, be necessary or desirable to accomplish the purposes of this resolution. Resolution to Authorize the Design of Penn Park in the Amount of $3.68 Million

The Departments of Recreation and Intercollegiate Athletics and Facilities and Real Estate Services recommend that the University proceed with the design of Penn Park. The purpose of this project is the design of a new urban park, fields and walkways on the newly acquired 14 acres of former Postal Lands south of Walnut Street and the re-conception of an additional 10 acres of University land to the immediate south. The design will build upon the program and spatial layout provided in the Penn Connects Campus Development Plan. The project will include design services for the space including a synthetic turf field, enclosed by a seasonal air structure, a second synthetic turf field, which is the probable future site of a mixed-use development, an NCAA-quality softball stadium, a two-tiered 12-court tennis facility, a natural grass field at the location of the future parking garage, two natural turf public open space fields, and a 300-car surface parking area, which is the probable future site of another mixed-use development. The project also aims to achieve leading sustainable design practices to minimize impact on natural resources and to mitigate existing burdens on the ecosystem.

The design is estimated to cost $3.68 million and will be funded by an internal capital project loan shared between the Departments of Recreation and Intercollegiate Athletics and Facilities and Real Estate Services. The project is expected to begin in November 2007.
