Two hundred and fifty years ago Philadelphia was the largest city in the British colonies of North America. The Delaware River waterfront was the very heart of the urban center, as it was the place of bustling commerce and noisy industry. This view identifies the spires of the city churches and public buildings, including that of the College and Academy of Philadelphia.

Keeping Franklin’s Promise

Two thousand and six represents a milestone in the life of the University and our graduates. Not only is it Penn’s 250th Commencement, but it is also the 300th anniversary of Benjamin Franklin’s birth. We are proud to claim Franklin as our founder. He continues to dazzle us with his genius and enrich our lives.

We still make use of his scientific breakthroughs and inventions and the civic institutions that he established. We enjoy the blessings of freedom in an American democracy he helped to create. We draw pleasure and inspiration from his writings.

Nowhere does Franklin feel more contemporary, more revolutionary, and more alive than at the University of Pennsylvania. His startling vision of a secular, nonsectarian Academy that would foster an “Inclination join’d with an Ability to serve Mankind, one’s Country, Friends and Family” has never ceased to challenge Penn to redefine the scope and mission of the modern American university.

When pursued vigorously and simultaneously, the two missions – developing the inclination to do good and the ability to do well – merge to help form a more perfect university that educates more capable citizens for our democracy.

Penn has embodied and advanced Franklin’s revolutionary vision for more than 250 years. Throughout its history, Penn has extended the frontiers of higher learning and research to produce graduates and scholars whose work has enriched the nation and all of humanity.

The modern liberal arts curriculum as we know it can trace its roots to Franklin’s innovation to have Penn students study international commerce and foreign languages.

The first medical and business schools in the United States were launched here.

And the first general-purpose electronic, digital computer – ENIAC – was invented right here at the University of Pennsylvania.

At Penn, the never-ending quest for innovation and academic distinction has found perfect Franklinian expression in “The Penn Compact,” President Amy Gutmann’s bold vision for propelling our University from excellence to eminence in all our core endeavors. Fulfilling the goals of the Compact – cultivating eminent faculty, increasing access for talented students of all backgrounds, integrating knowledge across multiple disciplines, and engaging our knowledge with communities locally and globally – will position Penn to make the greatest possible contribution to our society and our world.

Today, Penn proudly graduates a class of men and women who have shown the intelligence, drive, integrity, and character to become engaged citizens who will serve humanity with distinction. Our Penn graduates are poised to take their place as productive democratic citizens and as just and humane stewards of our world.

In these challenging and perilous times, a world in need of young men and women who are willing to shoulder the moral responsibilities of leadership can look to Penn.

Franklin wrote: “We may make these times better if we bestir ourselves. The noblest question in the world is ‘What good may I do in it?’”

The answer to this question will be furnished by Franklin’s newest heirs, the graduates of 2006.
Commencement Seating

Guests will find this diagram helpful in locating the approximate seating of the degree candidates. The sequence in which the candidates are presented for degrees is shown on the next page. The list on page 13, detailing the colors of the candidates' hoods according to their fields of study, may further assist guests in identifying the locations of the various schools.

In case of emergency, evacuation procedures will be announced.

Oh, say, can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars, thro' the perilous fight'
O'er the ramparts we watched, were so gallantly streaming.
And the rockets red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say, does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

THE RED AND BLUE

By William J. Goeckel, Class of 1896, and Harry E. Westervelt, Class of 1898

Come all ye loyal classmates now, in hall and campus through,
Lift up your hearts and voices for the royal Red and Blue.
Fair Harvard has her crimson, old Yale her colors too,
But for dear Pennsylvania, we wear the Red and Blue.

(Chorus)
Hurrah! Hurrah! Pennsylvania!
Hurrah for the Red and the Blue;
Hurrah! Hurrah! Hurrah! Hurrah!
Hurrah for the Red and the Blue.

RECESSIONAL
To the PRINTERS of the PENNSYLVANIA GAZETTE. BY Order of the Trustees, we send you the following PLAN of EDUCATION, now fixed by them for a three Year Trial, in the LATIN, GREEK, and PHILOSOPHY SCHOOLS, of the College and Academy of this City; by a bare Inspection of which, any Parent may know what Progress his Son makes, and what is his Standing, as well as what Books to provide, from Time to Time. The Plan of the English School, and the School for the practical Branches of the Mathematics will also be laid before the public as soon as possible.

... Thus it is hoped the Student may be led thro’ a Scale of easy Ascent, till finally rendered capable of Thinking, Writing and Acting well, which is the grand Aim of a liberal Education.

WILLIAM SMITH, Provost of the College and Academy
FRANCIS ALISON, Vice Provost of the College, and Rector of the Academy

―Plan of Education in the College," August 1756.
In the spring of 1756, Penn's first Provost, Reverend William Smith, re-organized the curriculum of the College of Philadelphia along the lines of the traditional English college. The Trustees, after a full review, approved the proposal and voted that the new curriculum be published in the Philadelphia newspapers. The syllabus pictured here was published on the front page of Franklin’s Pennsylvania Gazette for 12 August 1756.
Beginning in 1749 and continuing over a period of seven years, Benjamin Franklin set out and steadily advanced his vision of higher education at the University of Pennsylvania. At the beginning, he authored and published two pamphlets of original and creative thinking: Proposals for the Education of Youth in Pennsylvania (1749) and Idea of the English School (1751). He guided the purchase of the first campus at Fourth and Arch Streets in Philadelphia and superintended the fitting out of the “New Building” for educational purposes. He recruited the first faculty and presided over the opening of the Academy of Philadelphia in January 1751. He dedicated himself to fundraising, in both the private and public spheres and in 1753 was rewarded with the gift of £500 sterling by Penn family proprietors of Pennsylvania, a sum sufficient to pay off the Academy’s initial debt. In 1755 he obtained from the Penns a collegiate charter, empowering the Trustees to confer degrees in the traditional manner of British colleges and universities. The College of Philadelphia, the culmination of Franklin’s work, was thereby established and he was, as observed by another Trustee, the “soul of the whole.”

In 1754 Franklin recruited a brilliant young Scotsman, William Smith, to be the first Provost of the College. In his conversation and writing, Smith was careful to defer to Franklin’s vision for a liberal arts education in the English language. In his actions, however, Smith hewed a very different line. In April 1756, in Franklin’s absence from a Board meeting, Smith introduced to the Trustees a traditional British curriculum, in which several years of preparation in Latin and Greek would lead to the study of philosophy in the classical languages. It was a proposal drawn from Medieval antecedents, not at all sympathetic to Franklin’s forward-looking English School. In fact, it permanently relegated the English School to second class status in the organization of the College. Franklin, whose attention was now drawn to politics and public affairs, was voted out of the presidency of the Board of Trustees in June 1756. He continued to attend Board meetings until his departure for London in the spring of 1757, but his work at the University was finished and his influence gave way to the Provost he had once considered to be his protégé.

1806 – Rise of the School of Medicine

Resolved, That the building committee be authorized to contract for the execution of the plan reported by them, for the erecting [of] a suitable building for the Medical Schools, provided it can be done for any sum not exceeding sixteen thousand Dollars and also to sell such property and collect such of the Monies belonging to the institution as may be necessary to comply with their contract.

Minutes of the Trustees, 4 March 1806

In 1765 William Morgan and others proposed the establishment of a medical school in Pennsylvania and the Trustees of the College agreed to take it under their administrative umbrella and issue its graduates the degree of Bachelor of Medicine. Penn thereby became the first university in British North America (Columbia was second, in 1768, when it also established a medical school in addition to its college). The Medical Department, as it was known, flourished and in 1797 the number of its graduates began to exceed those of the College. For the next 110 years the Medical Department boldly stood forward as the largest and most prestigious school at Penn.

In 1806 the faculty of the Medical Department proposed a new medical building to the Trustees of the University. Four years earlier both the College and Medical Department had moved to a new campus. It was located on the west side of 9th Street, between Market and Chestnut Streets. For the first few years the two faculties did their best to co-exist in a single, large building. The experiment did not work well. The medical faculty in particular found their space ill-suited to their research in and demonstrations of anatomy, chemistry, medicine, pharmacology, and surgery. The new Medical Hall was designed by William Strickland, Philadelphia’s most prominent architect of the time. It opened in 1807 and enrollment in the Medical Department more than doubled within two years.
1856: A Renewed Library in support of an Expanded University

The Committee on the Library and Philosophical Apparatus who were instructed on the 6th of May last to report on the reorganization of the Library and the expense thereof, made report,

That they deem it expedient that the arrangements contemplated by the Board in their resolutions of 3 April 1855 for the organization of a library and the alteration and adaptation of rooms in the University for that purpose should be at once commenced so that they may be completed at the opening of the next Collegiate year in September, and submitted the following resolution:

Resolved that the Committee on the Library and Philosophical Apparatus be authorized to lay out a sum not exceeding four hundred dollars upon the alteration and adaptation of... the Trustees' Room and the one adjoining it for a Library and also to lay out a further sum not exceeding two hundred dollars in the purchase of and subscription to books for the same.

Minutes of the Trustees, 1 July 1856

A renewed library was an essential element of the University's expansion in the 1850s. Beginning in the fall of 1856 and continuing to the present day, the Trustees and faculty have demonstrated continuous support for the idea that the University library stands at the heart of the institution. In 1855 and 1856 the Trustees provided space for the library; placed it under the supervision of one of the senior faculty; established an annual budget for library acquisitions; directed that the library be open from Monday through Saturday; made provision for the books to circulate; and made the library available "for the use of the Students, Professors, Trustees, and Alumni of the University."

The Commencement of 1856 reflected an institution of higher education entering the first stages of becoming modern. The College and Medical Department were supplemented in 1850 and 1852, respectively, by a Law Department and the beginnings of a school of engineering and applied science. Also in 1852 the Trustees had established the degree of Bachelor of Science in the College, the first time in the history of Penn when an undergraduate degree did not require mastering the classical languages and literature. By 1856 a new order was apparent in the several graduating classes. The University conferred a total of 189 degrees that year, 147 of which were Doctors of Medicine; 25 of which were the traditional Bachelor of Arts; 15 of which were conferred upon the fifth graduating class of the Law School; and one of which was the new Bachelor of Science. The Trustees awarded one honorary degree, a Doctor of Divinity to The Rev. William Henry Odenheimer, rector of St. Peter's Episcopal Church, Philadelphia, and in later years, Bishop of the Diocese of New Jersey. The shrinking size of the College in proportion to the professional schools indicated the path the University would follow for the next hundred years.
Two days later, at the Academy of Music, Broad and Locust Streets, the Franklin Bi-Centenary ceremonies continued, with the award, by the Trustees of the University, of no less than twenty honorary degrees. Representatives of learned societies and institutions of higher education across America, Canada, Great Britain, and Europe included the American Philosophical Society, the Royal Academy of Sciences in Berlin and the universities of Amsterdam, Holland; Cambridge, England; Edinburgh, Scotland; McGill, Canada; St. Andrews, Scotland; Chicago; Cornell; Harvard; Johns Hopkins; Princeton; and Virginia. The most notable recipient was King Edward, VII of England, who accepted the honorary degree through his Ambassador to the United States. The Orator of the day was Hampton L. Carson (A.B., 1871; LL.B., 1874), Attorney General of Pennsylvania, who quoted Ralph Waldo Emerson, “He is truly great who is what he is from nature, and who never reminds us of others.”

By 1906, Franklin’s aim of a liberal arts education in the English language had finally become a reality at the University of Pennsylvania. At that year’s Commencement only twenty-seven graduates earned the traditional Bachelor of Arts degree, while 146 earned Bachelor of Science degrees, which required no advanced study of the classical languages. Franklin’s utilitarian approach to higher education was also reflected in the extraordinary growth of Penn’s professional schools. The School of Dental Medicine graduated 110; the School of Medicine, 102; the Law School, 61; and the School of Veterinary Medicine, 30. Taken together, the professional schools were almost twice the size of the College. Though the College was growing rapidly, Penn – as it had been in 1806 and 1856 – was still primarily a training ground for the American professions.

1906: The Persistence of Franklin’s Vision

The opening exercises of the celebration of the bi-centenary of the birth of the founder of the American Philosophical Society and of the University of Pennsylvania, were held in Witherspoon Hall on Tuesday evening last, April 17, 1906.

The greetings of the American Philosophical Society were extended by the president, Dr. Edgar F. Smith, the various learned bodies in all parts of the world delivered addresses, and Andrew Carnegie, as Lord Rector of St. Andrew’s University, Scotland, conferred the degree of Doctor of Laws upon Miss Agnes Irwin, great-granddaughter of Benjamin Franklin and Dean of Radcliffe College, Cambridge.

Every considerable learned body or institution in America and Europe had accepted the invitation of the American Philosophical Society to take part by delegate or communication in the celebration. About two hundred delegates were present.

1956: Franklin’s Triumph

Youth will come out of this School fitted for learning any Business, Calling or Profession ... the Time ... being here employ’d in laying such a Foundation of Knowledge and Ability, as properly improv’d, may qualify them to pass thro’ and execute the several Offices of civil Life, with Advantage and Reputation to themselves and Country.

Benjamin Franklin, Idea of the English School, 1751
I do not suggest that all of you should earn your livelihood in Government service although I hope that many of you will choose to do so, because that service is worthy of the best that is in you. ... I urge you to do it now, first because in all probability you have more time now than at any other period of your active career. Secondly, it may be too late to remedy some things you know should be remedied if you wait until the evening of your lives, and thirdly, if you do wait until that time you will not have laid the foundation for effectiveness.

U.S. Chief Justice Earl Warren
Mid-Year Convocation, Irvine Auditorium, 11 February 1956

National strength is therefore a fabric which is made up of many different strands. ... Implicit in these is a talent which university education should go far to promote. I refer to the talent for negotiation. The ability to find the common meeting ground, and to work out the compromise to which all can adhere is a useful talent in all public affairs. In our international relations it is vital. In its highest development it is one of the greatest of human talents. ... I am keenly aware of how much the world needs men and women endowed with a genius for negotiation - and for thus moving all humanity ahead on a broad front.

Henry Cabot Lodge
U.S. Ambassador to the United Nations
200th University Commencement, 13 June 1956

Penn initiated the new year of 1956 with a special Founder's Day Convocation, at which the Trustees conferred honorary degrees upon the Presidents and Chancellors of the five universities which had similarly honored Franklin in his lifetime. Franklin received honorary Master of Arts degrees from Harvard, Yale, and William and Mary and honorary doctorates from St. Andrew's in Scotland and Oxford University in England. Nathan M. Pusey, President of Harvard, said, "Franklin perhaps did more than any other individual to nourish higher education in the Colonies. ... [Franklin was a] kind of one-man university" himself.

1956 was also year of change and promise for the future. The Ford Foundation granted Penn more than $2 million to increase faculty salaries and total fundraising increased more than 50% over the previous year. The City of Philadelphia prepared to close Woodland Avenue and Penn pur-

Whereas, the well-being of a society depends on the education of their youth, as well as, in great measure, the eternal welfare of every individual, by impressing on their tender minds principles of morality and religion, instructing them in the several duties they owe to the society in which they live, and one towards another, giving them the knowledge of languages, and other parts of useful learning necessary thereto, in order to render them serviceable in the several public stations to which they may be called. ...  

Benjamin Franklin
President of the Trustees
Charter of the Academy and Charitable School
13 July 1753

I propose a compact, a Penn Compact, that expresses our boldest aspirations for higher education – a compact based on our shared understanding that “Divided we fail. United we flourish.” By honoring this Penn Compact, we will make the greatest possible difference in our university, our city, our country, and our world. The Penn Compact that I propose encompasses three principles. The first is increased access. ... The second is to integrate knowledge. ... The third is to engage locally and globally. By putting our principles into ever better practice, our Penn family will rise from excellence to eminence in teaching and research as we become ever more accessible. I ask that you join me in uniting behind our Penn Compact. Let us make this new beginning at Penn worthy of our boldest aspirations. Together we shall rise, as together we serve.

Amy Gutmann
President of the University
Inaugural Address 15 October 2004

At today’s Commencement the University will celebrate the award of approximately 8,000 degrees, nearly four times more than it did in 1956. Befitting a major research institution, the School of Arts and Sciences and the Graduate Faculties lead the way. The Bachelor of Arts degree has emerged in modern times as the University’s most popular. Approximately twenty-seven percent of today’s recipients will be taking that degree. The Doctor of Philosophy degree is now the fourth most awarded. Approximately seven percent of the total will be the Ph.D. The second and third most awarded are Wharton’s Master of Business Administration and Bachelor of Science in Economics, representing sixteen percent and eight percent respectively. These four degrees account for more than fifty percent of all Penn degrees. The other professional schools, once Penn’s most populous, remain very prestigious, but much smaller in proportion to the rest of the University than a century ago. The professional degrees of the schools of Law, Medicine, Dental Medicine, and Veterinary Medicine combined will make up only nine percent of all the degrees the University will confer. In the 21st century, Penn is first an institution of teaching and research and second, a consortium of schools of professional practice.

In 2006, the Penn Compact “embodies Penn’s vision for making our University both a global leader in teaching, research, and professional practice, as well as a dynamic agent of social, economic, and civic progress.” Over the past 50 years, the University of Pennsylvania has certainly grown sufficiently large and influential to achieve these impressive goals. Penn’s faculty of 4,200 leads more than 23,000 students through the apprenticeship of higher education and on to lives of public and private service. The faculty also generates more than $700 million a year in sponsored awards and projects. Penn’s staff of 13,000 supports the academic enterprise; the University’s Health System has a work force of an additional 11,000. Penn is thereby the largest private employer in the City of Philadelphia and the second-largest in the Commonwealth of Pennsylvania. Benjamin Franklin would be astonished ... and very pleased.

Also in this year, the Benjamin Franklin Tercentenary Consortium has coordinated the Ben Franklin 300 Philadelphia celebrations. Organized by the American Philosophical Society, the Franklin Institute, the Library Company of Philadelphia, the Philadelphia Museum of Art, and the Office of the Secretary at Penn, the Tercentenary Consortium’s projects form the official national celebration for America’s first founding father to reach 300. The centerpiece of the celebration is an international traveling exhibition, “Benjamin Franklin: In Search of a Better World” and its Philadelphia venue is the National Constitution Center. The year-long celebration on campus also includes an array of complementary exhibitions, lectures, symposia, concerts, and special events. Notable programs at Penn include exhibitions in College Hall, Van Pelt Library and the ICA, as well as symposia hosted by the Penn Humanities Forum, the School of Nursing, and the McNeil Center for Early American Studies, among others. The University honors its Founder, especially as it celebrates its 250th Commencement.

Mark Frazier Lloyd
Director
University Archives and Records Center
Today, May 15, 2006, is the University of Pennsylvania’s 250th Commencement. Penn traces its origins to a deed of trust executed in 1740 and is celebrating its 266th birthday this year. President Amy Gutmann will confer bachelors, masters, and doctoral degrees upon more than 6,000 graduates of the University’s 12 schools. Honorary degrees will be awarded to six individuals of distinction in varied fields, as you will note on pages 16, 17 and 18 in this program.

The practice of sporting signs on caps and gowns as a form of public proclamation at Commencement dates to the early 1760s and recalls an even more ancient tradition, originating in the practice of medieval universities. Penn’s archives contain several 18th century broadsides, printed in Latin, which were distributed to Commencement guests along with the regular programs. The broadsides contain a series of propositions classified under various academic headings. Presumably, the graduating students were willing to defend these theses against any assertions to the contrary. On the eve of the Revolution, however, statements such as “the rights of the people are as divine as the rights of their rulers” must have met with widespread sympathy.

Academic Ceremony and Regalia

Commencement exercises at American universities and colleges traditionally are composed of three essential elements: the Academic Procession, the conferring of degrees, and the Commencement address. This practice has been codified since 1895, when a national conference on academic costume and ceremony was proposed and a plan known initially as the “Intercollegiate System” was formally adopted. The Trustees of the University of Pennsylvania incorporated this code in the Statutes of the University in November 1896. Now under the aegis of the American Council on Education, the “Academic Costume Code and Academic Ceremony Guide” was revised in 1932 and 1960.* Throughout the 20th century, Commencement at Penn has, with minor modifications, followed the dictates of the code and its revisions.

By 1896, however, Penn had been granting degrees for nearly 140 years. Like other American colonial colleges, Penn borrowed its 18th century Commencement rituals directly from the English universities. In England the history of academic dress reaches back to the early days of the oldest schools. As early as the second half of the 14th century, the statutes of certain colleges prohibited “excess in apparel” and required the wearing of a long gown. It is still an open question as to whether academic dress finds its sources chiefly in ecclesiastical or in civilian dress. It is often suggested that gowns and hoods were the simplest, most effective method of staying warm in the unheated, stone buildings which housed medieval scholars. In any case, academic regalia had evolved to contemporary familiarity by the time Benjamin Franklin was awarded an honorary Doctor of Laws by the University of St. Andrews in 1759.

Traditions and Current Practice at Penn

In April 1887, on the recommendation of a committee of the faculty, the Trustees adopted the “Pennsylvania System of Academic Costume.” The colors and trimmings of hoods and caps were regularized according to faculty and degree. Beginning with the Commencement of 1887, the “Pennsylvania System” was published in each year’s program and adherence to its rules was expected of trustees, faculty, and students alike. Beginning in 1896, the “Pennsylvania System” was superseded by the “Intercollegiate System,” which has continued in effect to the present time.

The gowns used in American academic ceremonies vary according to the highest degree awarded to the wearer. The gown for the bachelor’s degree has pointed sleeves; it is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut and the front has an arc cut away. The masters gown may be worn open or closed. The doctoral gown is a more elaborate costume faced down the front with black velvet and across the sleeves with three bars of the same; these facings and crossbars may be of velvet of the color distinctive to the field of study to which the degree pertains. The doctoral gown has bell-shaped sleeves and may be worn open or closed. Some institutions have authorized doctoral gowns in colors other than the customary black; holders of the University of Pennsylvania Ph.D. may wear red and blue gowns.

The hoods are lined in silk with the official color or colors of the college or university which granted the highest degree held by the wearer; more than one color is shown by division of the field color in a variety of ways, such as by chevron or chevrons. The binding or edging of the hood is in velvet, with widths of two inches, three inches, and five inches for the bachelors, masters, and doctoral degrees, respectively. The color of the border indicates the field of study to which the degree pertains. University of Pennsylvania graduates wear a hood lined in red with a blue chevron. The mortarboard cap is standard, though soft square-topped caps are permissible.

Recipients of doctorates may wear a gold tassel fastened to the middle point of the top of the cap; all others wear black.

Degrees shall be conferred today according to the following order:

- Arts and Letters, white Science, golden yellow Business Administration, mustard Nursing, apricot Medicine, green Law, purple Design, brown Dental Medicine, lilac Veterinary Medicine, gray Education, light blue Social Policy and Practice, citron Philosophy, dark blue

The Academic Procession

The order for today's Academic Procession is as follows:

- Mace Bearer President and Provost Chairman of the Board of Trustees Commencement Speaker Candidates for Honorary Degrees Deans Trustees Officers of the University Faculty Overseers Visiting Dignitaries

The Secretary of the University carries the University mace, the symbol of authority of the University, at the head of the Academic Procession. It was a gift of the family of William Murray Gordon, M.D. 1910. It is adorned with the seal and arms of the University, the Penn and Franklin coats-of-arms, a depiction of the Rittenhouse orrery, and a thistle symbolizing the early ties of the University with Scotland.

The President's Badge of Office

The President wears as a badge of office a silver medallion of which one face is engraved, like the mace, with the University seal. The obverse of the President's medal bears the "orrery seal," designed in 1782 by Francis Hopkinson, A.B. 1757, a Signer of the Declaration of Independence. The medal, suspended on a chain composed of silver links, was given by the late Trustee Thomas Sovereign Gates, Jr., A.B. 1928, LL.D. 1956, on the occasion of Sheldon Hackney's inauguration as President in October 1981.

University Seal and Symbols

The Seal of the Corporation

The Trustees of the University have an official seal that is, in effect, the signature of the corporation. It had its origin at a meeting of the Board of Trustees in 1755 with Benjamin Franklin as Chairman. Though the seal underwent changes over the years, the most recent design, approved in 1932 and adopted in 1933, returned it to virtually its original form.

The seal is composed of seven books stacked on a slanted desk top with the books bearing the following titles, representing the curricula of the day: Theolog, Astronom, Philosoph, Mathemat, Logica, Rhetorica, Grammatica. On the periphery of the stack of books appears the University motto, Leges Sine Moribus Vanae and the whole is encircled with the inscription Universitatis Pennsylvaniensis.

Penn Coat-of-Arms

The Penn coat-of-arms was derived by combining the coat-of-arms of Benjamin Franklin and that of William Penn's family. The dolphin on the red chief was part of Franklin's coat-of-arms and the three silver plates on a blue chevron were a part of Penn's. The two were combined on a white shield along with two open volumes representing Pennsylvania's educational purpose.

Motto: Leges Sine Moribus Vanae

The motto of the University, Leges Sine Moribus Vanae, means "Laws without morals are useless." It comes from the longer quotation from Horace, "Quid leges sine moribus vanae proficiunt?" the sense of which is "of what avail are empty laws without (good) mores?"

School Colors

Eighteenth century American academic institutions did not have colors. The earliest known representation of the combined Penn colors, red and blue, is on the incised lid of the 1871 College Hall cornerstone.

One legend traces their origins to an early track meet at Saratoga, New York, between Penn, Harvard, and Yale. When asked by the officials what colors would be representing the Penn team, the Pennsylvania captain reportedly replied, "We're going to be wearing the colors of the teams we beat," i.e. Harvard Crimson and Yale Blue. We shall assume that Penn was victorious and thus remained loyal to the Red and Blue.
The School of Arts and Sciences (1755)
The School of Arts and Sciences (SAS) is the direct descendant of the College of Philadelphia, where Benjamin Franklin established the first modern arts and sciences curriculum in the English colonies. Undergraduate programs for men date to the chartering of the College in 1755; the College of Liberal Arts for Women was founded in 1933. The Graduate School was established in 1882 with the appointment of a Faculty of Philosophy. The College of General Studies (lifelong learning) traces its roots to 1892. The School of Arts and Sciences was born in 1974 with the merger of the College of Arts and Sciences, the College for Women, the Graduate School, and four social science departments from Wharton. Today SAS is the largest of the University’s 12 schools, providing a liberal arts education for all Penn undergraduates and supporting graduate studies, basic research, and continuing education across the full range of the humanities, natural sciences, and social sciences. The School has 26 departments with 480 standing faculty, 27 research centers, six interschool institutes, and 10,000 students.

The Law School (1790)
Legal education at Penn began in 1790 with a series of lectures on law by its first law professor, James Wilson, a signer of the Declaration of Independence and one of the original six justices of the Supreme Court of the United States. After a long hiatus, instruction in law was reestablished in 1850 by George Sharswood; in 1852 the Bachelor of Laws degree was conferred for the first time, and in 1888 the course of study was extended from two to three years. Today Penn Law’s pervasive cross-disciplinary program sets the standard in legal education with an unparalleled program that starts at the Law School and extends throughout the University. A majority of our faculty hold advanced degrees beyond law and many have joint appointments, adding a broader perspective to the classroom. Our students augment their legal education with classes throughout the University, and earn certificates and joint degrees from many of the graduate and professional programs. In the 2005-2006 academic year the Law School has 885 students; 52 standing faculty including eight associated faculty and clinicians, one senior fellow, and one senior lecturer; and 72 practitioners/lecturers. The School awards four degrees: Juris Doctor; Master of Laws; Master of Comparative Laws; and Doctor of the Science of Law.

The School of Engineering and Applied Science (1852)
The School of Engineering and Applied Science (SEAS) is one of the oldest in the United States, tracing its beginnings to the establishment of the School of Mines, Arts and Manufactures in 1852. The first graduate of the School received a Bachelor of Science degree in 1854. Since that time, the School has grown into a center of excellence in the creation of technology and in technology education. Its spirit of innovation led to the creation of ENIAC, the first all-electronic, large-scale, general-purpose digital computer, making SEAS the birthplace of the computer age. Today, Penn Engineering offers a wide range of undergraduate and graduate programs, including the first alternative liberal arts program based in an engineering school. SEAS is particularly distinguished by its interdisciplinary, cross-school programs such as Management and Technology, Digital Media Design, Biotechnology, and the Executive Masters in Technology Management. Penn Engineering currently has about 101 standing faculty, approximately 1,500 undergraduate students, 1,000 graduate students, four research institutes, seven research centers, and one regional institute.

The School of Design (1869)
Although the School of Design dates its founding from 1890, architecture courses were first offered at the University of Pennsylvania in 1869, making Penn’s architecture program the second oldest in the United States. In 1921, the Department of Architecture joined with the Department of Music and Fine Arts to create an independent undergraduate School of Fine Arts modeled on the French Ecole des Beaux Arts. In 1958, the School was renamed the Graduate School of Fine Arts, reflecting the shift to graduate degree offerings in architecture, city and regional planning, landscape architecture and fine arts. The triumph of architecture, landscape architecture and city planning shaped the core of the School in the 1950s and 1960s. In the 1980s, a program in historic preservation was added. Today, the School provides a rich environment for the study of the arts, architecture, landscapes and urbanism. Its opportunities now include undergraduate study in fine arts, architecture and digital media design. As a more accurate description of the School’s major concerns and advancements made across a variety of fields, the School was renamed, in 2003, the School of Design. The School has a standing faculty of 30, approximately 130 lecturers and associated faculty, and more than 500 students.

The School of Dental Medicine (1878)
The Trustees of the University of Pennsylvania established a faculty of dentistry in March 1878 making Penn Dental the third oldest university-affiliated dental school in the nation. The School’s first decades were remarkable for the diversity of its students, for even in the 1880s, nearly every state in the Union and many foreign countries were well represented. The School was endowed by Thomas W. Evans, a native Philadelphian and an extraordinary dentist, whose legacy made possible the construction of the School’s Evans Institute in 1915, which remains the site of much of the School’s clinical and classroom instruction. Penn Dental’s educational, research and patient care facilities reached a new level of excellence with the recent construction of the state-of-the-art Robert Schattner Center. As a major provider of dental care to the West Philadelphia neighborhood, the School has also established innovative community outreach programs.
The Wharton School (1881)
The Wharton School of the University of Pennsylvania – founded in 1881 as the first collegiate business school – is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. The most comprehensive source of business knowledge in the world, Wharton bridges research and practice through its broad engagement with the global business community. The school has more than 4,600 undergraduate, MBA, executive MBA, and doctoral students; more than 8,000 annual participants in executive education programs; and an alumni network of more than 81,000 graduates.

The School of Veterinary Medicine (1884)
Established in 1884, the School of Veterinary Medicine is one of the leading research, teaching, and clinical veterinary institutions in the world. The School, founded on the recommendation of the University’s School of Medicine, is firmly rooted in the medical sciences. The School’s administrative offices, classrooms, many research laboratories, and the Matthew J. Ryan Veterinary Hospital are located on the Penn campus in Philadelphia. The Vernon and Shirley Hill Pavilion, also located on the Penn campus, is scheduled for completion in the fall of 2006 and will house the School’s administrative offices, classrooms, many research laboratories, and the Matthew J. Ryan Veterinary Hospital.

The School of Social Policy and Practice (1948)
The School of Social Policy and Practice began in 1908 as a private school that opened its doors to five students in the field of child welfare. The School affiliated itself with the University of Pennsylvania in 1935, and the Doctor of Philosophy program in 1978. The School is widely recognized for its leadership in nursing research and its innovations in nurse-managed clinical practice. It is a World Health Organization Collaborating Center for Nursing and Midwifery Leadership. The School of Nursing has 50 standing faculty and 940 students.

The School of Nursing (1935)
Nursing Education at Penn began in 1886 when the Hospital of the University of Pennsylvania started a nurse training program. In 1935, the Trustees of the University of Pennsylvania established a nursing degree program within the School of Education, and in 1950 the School of Nursing was established. The Master of Science in Nursing program was instituted in 1961, the Doctor of Nursing Science program in 1978, and the Doctor of Philosophy program in 1984. These innovations and a curriculum which progressively reflects changing health care delivery patterns have advanced the School into the first rank of American schools of nursing. The School is recognized for its leadership in nursing research and its innovations in nurse-managed clinical practice. It is a World Health Organization Collaborating Center for Nursing and Midwifery Leadership. The School of Nursing has 50 standing faculty and 940 students.

The Graduate School of Education (1914)
The Graduate School of Education (GSE) is nationally distinguished as a leader in the production of education research and in the preparation of education practitioners. GSE is unique among schools of education in its emphasis on the interactive relationships of education theory, research and practice. The School is organized into four divisions with 37 standing faculty, nine research centers, and approximately 1,000 students. Originally an undergraduate education school and, for many years, a five-year professional school, GSE now provides advanced professional qualifications for educators, offering courses that lead to the Master of Science, Doctor of Education, and Doctor of Philosophy degrees. The School also offers executive doctoral degree programs and a broad schedule of continuing education courses.

The Annenberg School for Communication (1959)
Founded in 1958 through the generosity and vision of diplomat and philanthropist Walter Annenberg, the Annenberg School for Communication at the University of Pennsylvania is devoted to furthering our understanding of the role of communication in public life through research, education and service. At the School’s founding, Ambassador Annenberg identified its unique mission: "Every human advancement or reversal can be understood through communication," he said. "The right to free communication carries with it responsibility to respect the dignity of others – and this must be recognized as irreversible. Educating students to effectively communicate this message and to be of service to all people is the enduring mission of this school."

Nationally ranked as the best graduate program in mass communication, health communication, political communication, and culture, society and communication, the Annenberg School has 16 standing faculty, 3 secondary faculty, 70 graduate students and over 200 undergraduate students. The school offers the degree of Doctor of Philosophy, and runs an undergraduate program through the College of Arts and Sciences. The School is home to the Annenberg Public Policy Center, the Center of Excellence in Cancer Communication Research, the Project for Global Communication Studies, the Scholars Program in Culture & Communication, Communication and Public Service, among many additional projects pursuing innovative communication research and services.
HONORARY DEGREE CITATIONS

Jodie Foster

As actress, director, businesswoman, and mother, you have defied Hollywood’s stereotypes to pursue your own voice. With exceptional intelligence and depth, you have chosen controversial subjects and portrayed characters whose plights - runaway, child prostitute, rape victim - illuminate painful societal issues.

Pablo Picasso once said that, “Every child is an artist. The problem is how to remain an artist once we grow up.” You made your acting debut at age three; by the time you appeared in Martin Scorsese’s ground-breaking film Taxi Driver (1976) at the age of 12, acting had become your métier. In Taxi Driver you navigated a netherworld that Dostoevsky would have recognized. As the teen-age prostitute Iris, you revealed an old soul with a child’s fragile emotions, a child whom loner Travis Bickle was compelled to try to rescue. Your luminous performance earned you your first Oscar nomination and awards from the National Society of Film Critics, the Los Angeles Film Critics, and the British Academy of Film and Television Arts.

In the midst of a burgeoning career, as a young woman coming of age, you made the unusual decision to further your education and earned a degree in literature at Yale University. Your successful transition from precocious child star to adult film artist was capped by stunning, Oscar-winning performances in The Accused (1988) and in The Silence of the Lambs (1991). The first actress to receive two Oscars before the age of 30, you turned to directing and explored isolation, abuse, and fear as director and producer of 1991's Nell. You have continued to spread your acting wings in provocative films such as Contact (1997), Flightplan (2005), and Inside Man (2006) while attending to your two young children.

For employing your incredible artistry to challenge injustice and provoke thought, for your willingness to take professional risks, and for advancing the values of independence and integrity within your industry, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Jodie Foster, the degree of Doctor of Arts, honoris causa.

Henry Louis Gates, Jr.

As a brilliant scholar, author, teacher, and critic, you have devoted your life to charting the rich cultural, political, and literary terrain of the African American experience. Your pioneering research and persuasive advocacy have thrust open a long-frozen window into our past and dramatically increased scholarly and public attention.

You have recovered lost treasures with the perseverance of Jacques Cousteau. In 1983, you discovered the 1859 manuscript of Harriet E. Wilson's Our Nig, the first novel written by a black person in the United States. In 2002, you discovered, authenticated, and published the manuscript of the first novel by an African American slave, known as The Bondswoman's Narrative. Your memoirs, articles, lectures, and books, along with anthologies and encyclopedias that you have edited, raised transformative questions and helped to embed African American studies into the liberal arts curricula throughout the world. Your vivid insights and engaging manner on the 2006 African American Lives - the most recent of three PBS television series that you produced and hosted - wove America’s past and present into a cohesive fabric.

Born in Piedmont, West Virginia, you graduated summa cum laude from Yale University (1973), earned your Ph.D. in English Literature from the University of Cambridge, and taught at Yale, Cornell and Duke universities before joining the faculty of Harvard in 1991 as W.E. B. DuBois Professor of the Humanities and Director of the W.E. B. DuBois Institute for African and African American Research. You built the DuBois Institute into a preeminent scholarly enterprise that administers the prestigious Fletcher Fellowships for the improvement of race relations. Your many honors include a MacArthur Foundation “genius grant,” a National Humanities Medal, and election to the American Academy of Arts and Letters.

For towering contributions to the understanding of human history and racial identity and for urging society ever closer to your vision of “a humanity that is neither colorless nor reducible to color,” the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Henry Louis Gates, Jr., the degree of Doctor of Humane Letters, honoris causa.
Shirley Ann Jackson

Your father encouraged you to “aim for the stars so that you can reach the treetops.” Heeding that advice, you conducted childhood experiments observing mice and bees and went on to break new ground in science, education, and public policy. Whether exploring microscopic particles, shaping international nuclear regulatory programs, or leading a venerable university, you have roared past the treetops and continue to rocket skyward. In fields with few women and fewer African Americans, your dramatic ascent has inspired us all and has encouraged others to pursue science careers.

You earned a B.S. in physics from the Massachusetts Institute of Technology, where you founded the Black Students Union and in 1973 you became the first African American woman to earn a Ph.D. from MIT. Today you serve as a life member of the MIT Corporation.

After conducting postdoctoral work in particle physics in the United States and Europe, you were a stellar researcher in theoretical physics at AT&T’s Bell Laboratories and later joined the physics department at Rutgers University.

In 1995, President Clinton appointed you Chair of the Nuclear Regulatory Commission, a post you held with great distinction. You helped to form and served as founding chair of the International Nuclear Regulators Association. In 1999, you were elected President of Rensselaer Polytechnic Institute and are leading the university to ever higher heights.

Your numerous advisory positions have included: Chair and President of the American Association for the Advancement of Science; Trustee of the Brookings Institution, and member of the Council on Foreign Relations. You were elected to the National Academy of Engineering, the American Academy of Arts and Sciences, the American Physical Society, and the National Women’s Hall of Fame. Your remarkable record as a trailblazer, scholar, and leader has been recognized with the conferring of 32 honorary degrees. We are tremendously proud to make it 33!

For your extraordinary accomplishments, outstanding leadership, and dedicated public service in science, education and public policy, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Shirley Ann Jackson, the degree of Doctor of Science, *honoris causa.*

Lawrence R. Klein

In 1980, you were awarded the Nobel Prize in Economics for developing economic forecasting models that are used by business leaders and government policy makers throughout the world. In announcing your selection, The Royal Swedish Academy of Sciences noted that, “Few, if any, research workers in the empirical field of economic science have had so many successors and such a large impact.”

After undergraduate school at the University of California, you earned a Ph.D. at the Massachusetts Institute of Technology, and then joined the Cowles Commission for Economic Research at the University of Chicago. There you formulated the model that enabled you to predict, against all conventional wisdom, an American economic upturn after World War II. Following stints at the University of Michigan and Oxford University, in 1958 you made Penn your academic home. Retired from active teaching since 1991, you continue to add luster to the University’s faculty as the Benjamin Franklin Professor Emeritus of Economics.

You founded the Research Seminar in Economics and Wharton Econometric Forecasting Associates. You have served as a trusted adviser to American and foreign government leaders, including President Jimmy Carter. As a leader of Project LINK, you worked to create the first world economic model.

Fired by your restless intellectual curiosity and your affinity for Asia, you helped to launch the *International Economic Review,* which is jointly published by Penn and Osaka University in Japan. You have fostered a lively scholarly exchange with the People’s Republic of China for more than 25 years.

A member of the American Philosophical Society, the American Academy of Arts & Sciences, the National Academy of Sciences, a corresponding member of the British Academy, and a foreign associate of the Russian Academy of Sciences, you hold honorary degrees and professorships from more than 30 universities worldwide.

For towering contributions to economics and to Penn, and for your life-long dedication to improving the welfare of humanity, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Lawrence R. Klein, the degree of Doctor of Science, *honoris causa.*
Judith Pollock Klinman

In a distinguished 40-year career as chemist and biochemist, you have advanced our understanding of the relationships between protein structure and function. Your research debunked existing theory and led to the discovery of quinoproteins, a new class of cofactors within proteins found in bacteria, plants, and mammals.

You achieved a second research breakthrough when you observed unexpected activity while studying dehydrogenases, the enzymes that break down alcohols that otherwise could be toxic. Your experiments to explain the phenomenon led to your discovery of the processes now known as hydrogen tunneling in enzymes, which fundamentally changed the way chemists think about the chemistry of enzyme catalysis. You have continued to open up exciting new areas of exploration around this phenomenon.

A native Philadelphian and daughter of Penn, you earned your bachelor of arts here in 1962 and your doctorate in organic chemistry in 1966. After completing your postdoctoral work at the Weizmann Institute in Israel and at University College, London, you returned to your alma mater as an assistant professor of biophysics and joined Philadelphia’s Institute for Cancer Research. In 1978, you moved to the University of California as a professor of chemistry, holding a joint appointment there since 1993 in the Department of Molecular and Cell Biology.

Your pathbreaking career has earned you numerous honors, including election to the National Academy of Sciences, the American Academy of Arts & Sciences, the American Philosophical Society and the Japanese Ministry of Science. You served as president of the American Society of Biochemists and Molecular Biologists and were awarded the Repligen Award by the American Chemical Society. You have lectured and published widely in the United States and throughout the world. Your passionate mentoring of female and minority students has inspired others to pursue careers and make important contributions to science.

For significantly advancing our understanding of the human body’s marvelous complexity, for challenging dogma, and for blazing paths for others to follow, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Judith Pollock Klinman, the degree of Doctor of Science, 

Stephen A. Wynn

With imagination, business acumen, and entrepreneurial prowess you reinvented the Las Vegas casino. You turned gaming houses into elegant family resorts that offer unforgettable theatrical experiences where guests are treated to erupting volcanoes, sinking pirate ships, and “dancing” shooting fountains.

You played your winning hand to transform the gaming industry and launch a decade-long boom that has revitalized your adopted city. Now you are bringing your magical touch to Asia, where you will build a new luxury casino in Macau, China.

As Founder, Chairman and CEO of Wynn Resorts, Limited, you created palaces of spectacular proportions. From The Golden Nugget in Atlantic City to Beau Rivage in Biloxi, your casinos have given much-needed boosts to tourism and local economies. In 1999 you opened The Mirage in Las Vegas, the largest casino in the world. With sharks lurking behind the front desk, The Mirage toppled the Hoover Dam as Nevada’s most visited tourist destination. A gallery of internationally renowned artworks at your European-themed Bellagio resort attracts visitors who enjoy entertainment in aesthetically pleasing settings. You summarized your aims in creating new ventures thus: “When you’re close to perfect, why wouldn’t you try for perfect?” In 2005, your Wynn Las Vegas resort, “a total resort experience designed to excite the senses,” opened to rave reviews.

Loyal son of Pennsylvania, after receiving your Bachelor’s degree in English Literature in 1963, you went on to serve your alma mater as a Trustee and enhanced our spirit of community with the gift of Wynn Commons. Other worthy causes benefit from your leadership as chair of the University of Utah’s Moran Eye Institute and member of the Board of the George Bush Presidential Library. You have been recognized with honorary degrees from the University of Nevada, Las Vegas and Sierra Nevada College.

For striving for perfection through the visionary creation of larger-than-life destinations, for spearheading the revitalization of the Las Vegas gaming and tourist industry, and for your leadership in advocating for improved education in the state of Nevada, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Stephen A. Wynn, the degree of Doctor of Laws, 

For Judith Pollock Klinman, the degree of Doctor of Science, 

For Stephen A. Wynn, the degree of Doctor of Laws,
In November 1749 Benjamin Franklin convened a group of twenty-four Trustees and established the “Academy of Philadelphia.” In February 1750 they purchased a campus on the west side of Fourth Street, just south of Arch. The deed pictured here documents that transaction.

COLLECTIONS OF THE UNIVERSITY ARCHIVES AND RECORDS CENTER.
In January 1751 the Academy enrolled its first students and held its first classes. In that same year Franklin published his *Idea of the English School*, which advocated a liberal arts education in the English language alone, rather than the traditional Latin and Greek. The Trustees divided on this question, however, and created both a Latin School and an English School.

**First or lowest CLASS.**

Let the first Class learn the *English Grammar* rules, and at the same time let particular Care be taken to improve them in *Orthography*. Perhaps the latter is best done by *Pairing* the Scholars, two of those nearest equal in their Spelling to be put together; let the fairest strive for Victory, each propounding Ten Words every Day to the other to be spelt; he that spells truly most of the other's Words, is that spells truly most of the other's Words, is that is Victor most. Candidates for the degrees of Master of Arts, Master of Science or Doctor of Philosophy can be found under the Graduate Faculties listing.

Note:
As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The student's transcript is the official record of the University.
As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a degree. The student's transcript is the official record of the University.

**Note:**

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

In June 1755 the Trustees obtained the collegiate charter pictured here from the Penn family proprietors of Pennsylvania. This enabled the Trustees to confer degrees and transformed the Academy into the College. In the spring of 1756 the Faculty prepared a curriculum and a year later, conferred Penn’s first degrees.

COLLECTIONS OF THE UNIVERSITY ARCHIVES AND RECORDS CENTER.
By 1762 the city of Philadelphia had grown out and beyond the campus of the College and Academy of Philadelphia. Penn’s campus at Fourth and Arch Streets contained two buildings: College and Academy Hall and the new Dormitory. Nicholas Scull, *A Map of the Improved Part of the City of Philadelphia, 1762*.
