In the words of one elegiac tribute, “Great men have two lives: one which occurs while they work on this earth; a second which begins at the day of their death and continues as long as their ideas and conceptions remain powerful.”

These words befit the great Benjamin Franklin, whose inventions, innovations, ideas, writings, and public works continue to shape our thinking and renew the Republic he helped to create and the institutions he founded, including the University of Pennsylvania.

Nowhere does Franklin feel more contemporary, more revolutionary, and more alive than at the University of Pennsylvania. His startling vision of a secular, nonsectarian Academy that would foster an “Inclination join’d with an Ability to serve Mankind, one’s Country, Friends and Family” has never ceased to challenge Penn to redefine the scope and mission of the modern American university.

When pursued vigorously and simultaneously, the two missions – developing the inclination to do good and the ability to do well – merge to help form a more perfect university that educates more capable citizens for our democracy.

Penn has embodied and advanced Franklin’s revolutionary vision for 272 years. Throughout its history, Penn has extended the frontiers of higher learning and research to produce graduates and scholars whose work has enriched the nation and all of humanity.

The modern liberal arts curriculum as we know it can trace its roots to Franklin’s innovation to have Penn students study international commerce and foreign languages.

The first medical and business schools in the United States were launched here.

And the first general-purpose electronic, digital computer – ENIAC – was invented right here at the University of Pennsylvania.

At Penn, the never-ending quest for innovation and academic distinction has found perfect Franklinian expression in “The Penn Compact,” President Amy Gutmann’s bold vision for propelling our University from excellence to eminence in all our core endeavors. Fulfilling the goals of the Compact – increasing access for talented students of all backgrounds, integrating knowledge across multiple disciplines, and engaging our knowledge with communities locally and globally – is the focus of Penn’s current $3.5 billion Making History campaign, and will position the University to make the greatest possible contribution to our society and our world.

Today, Penn proudly graduates a class of men and women who have shown the intelligence, drive, integrity, and character to become engaged citizens who will serve humanity with distinction. Our Penn graduates are poised to take their place as productive democratic citizens and as just and humane stewards of our world.

In these challenging and perilous times, a world in need of young men and women who are willing to shoulder the moral responsibilities of leadership can look to Penn.

Franklin wrote: “We may make these times better if we bestir ourselves. The noblest question in the world is ‘What good may I do in it?’”

The answer to this question will be furnished by Franklin’s newest heirs, the graduates of 2012.
Guests will find this diagram helpful in locating the approximate seating of the degree candidates. The sequence in which the candidates are presented for degrees is shown on the next page. The list on page 13, detailing the colors of the candidates’ hoods according to their fields of study, may further assist guests in identifying the locations of the various schools.

In case of emergency, evacuation procedures will be announced.

Oh, say, can you see, by the dawn’s early light,
What so proudly we hailed at the twilight’s last gleaming?
Whose broad stripes and bright stars, thro’ the perilous fight
O’er the ramparts we watched, were so gallantly streaming.
And the rockets red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say, does that star-spangled banner yet wave
O’er the land of the free and the home of the brave?

RECESSIONAL
In January 1748, Benjamin Franklin celebrated his 42nd birthday by admitting David Hall to partnership in his printing business and placing Hall in charge of all operations at the press. This arrangement enabled Franklin to withdraw from active printing work and to focus his full attention on public service. The timing was fortuitous because just two months earlier, one of Franklin’s brief, but powerful essays, a piece he titled Plain Truth, had instantly transformed him into one of Philadelphia’s leading public figures. In Plain Truth, Franklin first reviewed the recent history of armed raids by the French and Spanish on English shipping in the Delaware Bay and the refusal by the Quaker-dominated Pennsylvania Assembly to adopt any law directing the appropriation of public monies for the purpose of military defense. Franklin’s response to the political impasse was to advocate the creation of a volunteer militia, the officers and members of which would take appropriate steps to protect Philadelphia from similar attacks. He also authored a plan for a voluntary organization – the “Pennsylvania Association of 1747” – which was signed, within two or three weeks, by more than a thousand Philadelphians. Plain Truth, in Franklin’s own words, “had a sudden and surprising Effect.” By January 1748, Franklin – though he had yet to hold any public office – was Philadelphia’s most visible and most popular public leader.

Freed from the day-to-day responsibilities of the printing press, Franklin was swept up first into provincial governance: in October 1748, he was elected a member of Philadelphia’s city council; in June 1749, he was appointed a Justice of the Peace for Philadelphia County; in May 1751, he was elected a member of the Pennsylvania Assembly; in August 1753, he was appointed joint deputy postmaster general for North America.

Franklin simultaneously introduced the series of civic and intellectual innovations for which he is famous. In May 1747, Franklin wrote to Peter Collinson, in London, the first of several long letters which described his ideas on electricity and the experiments he had undertaken to test his theories. Collinson shared copies of these letters with others in England, who were unanimous in thinking they were “ingenious.” In February 1750, Collinson decided to have the letters printed and placed them in the hands of a highly respected English intellectual, John Fothergill, to review and edit them as he deemed appropriate. Franklin had time to make some additions and corrections and also to send still another letter on the subject. Fothergill was so favorably impressed that he endorsed Franklin’s work by writing a preface to the collected essays. Printed in pamphlet format and released to the public in April 1751, the eighty-six-page publication was titled, Experiments and Observations on Electricity, made at Philadelphia in America, and it quickly circulated throughout the scientific communities of Great Britain and Europe. “Nothing,” it was later stated, “was ever written upon the subject of electricity which was more generally read, and admired in all parts of Europe than these letters.”

In August 1749, Franklin initiated what he called a “public affair,” the same one that we celebrate today. He did so by placing an unsigned letter at the top of the front page of his Philadelphia newspaper, the Pennsylvania Gazette. It masqueraded as a communication to the editors which signaled the writer’s intentions with regard to a major civic improvement, an institution of higher education. The author, of course, was Franklin himself,
chiefly foreigners, unacquainted with our language, laws and customs; it is thought, a proposal for establishing an Academy in this province, will not now be deem’d unseasonable. Such a proposal the publick may therefore shortly expect.

Over the next two months, Franklin drafted the text of a plan for an educational institution, consulted with other prominent Philadelphians, re-drafted and perfected the plan, and then, in October 1749, he published and distributed widely a persuasive plea for the establishment of an “Academy, in which [the Youth of this Province] might receive the Accomplishments of a regular Education.” Franklin’s brief essay on education, which he titled, Proposals Relating to the Education of Youth in Pensilvania, has endured to our present time as one of the most influential of his writings. In it, he famously summarized both the means and the ends of higher education,

As to their Studies, it would be well if they could be taught every Thing that is useful, and every Thing that is ornamental; But Art is long, and their Time is short. It is therefore propos’d that they learn those Things that are likely to be most useful and most ornamental. Regard being had to the several Professions for which they are intended. …

The Idea of what is true Merit, should also be often presented to Youth, explain’d and impress’d on their Minds, as consisting in an Inclination join’d with an Ability to serve Mankind, one’s Country, Friends and Family; which Ability is (with the Blessing of God) to be acquire’d or greatly increas’d by true Learning; and should indeed be the great Aim and End of all Learning.

The response to Franklin’s Proposals was immediate and enormously supportive. In November 1749, the Trustees convened and adopted the “Constitutions of the Publick Academy in the City of Philadelphia.” In February 1750, they purchased land and a large, but unfinished building located on the west side of Fourth Street, between Market and Arch Streets and they authorized the conversion and finishing of the structure for educational purposes. In January 1751, the Academy enrolled its first students and taught its first classes. In July 1753, Thomas and Richard Penn, the Proprietors of the Province of Pennsylvania, granted the Academy a corporate charter. In June 1755, the Proprietors amended the charter to empower the Trustees to confer degrees and the corporate name of the institution changed to the “Trustees of the College, Academy and Charitable School of Philadelphia in the Province of Pennsylvania.” In May 1757, the College of Philadelphia, as it came to be commonly known, graduated its first class and conferred its first degrees.

Just as soon as the Academy opened in January 1751, Franklin was on to his next civic improvement. Later that same month, Franklin and Dr. Thomas Bond petitioned the Pennsylvania Assembly to incorporate the founders of the Pennsylvania Hospital and to match their contributions with public funds; by May of that year this proposal had become law; in July 1751, the Pennsylvania Hospital was organized; and in February 1752, the Hospital admitted its first patients.

Then, in July 1751, Franklin began still another project. In that month, he called on Philadelphia’s volunteer fire companies to send representatives to a general meeting for the consideration of a plan for the “Insurance of Houses;” in September of that year, the plan was approved; in February 1752, the books of the “Philadelphia Contributionship for the Insurance of Houses from Loss by Fire” were opened for subscription; in April of that year, the new fire insurance company was organized; and in June 1752, the Contributionship issued its first policies.

Franklin’s model of inspirational public citizenship did not end with any one of these several accomplishments. He simply moved on to the next “public affair.” Between January 1748 and April 1757, when he left Philadelphia to represent the Pennsylvania legislature before the British crown and Parliament, Franklin was a virtual – and continuous – engine of civic involvement and improvement.

250 YEARS AGO
The Commencement of 1762

In December 1761, the Trustees of the College, Academy, and Charitable School of Philadelphia in the Province of Pennsylvania – as Penn was then formally constituted – resolved to undertake Penn’s first capital campaign. In previous years the Trustees had relied on the proceeds from public lotteries to bridge the gap between revenues and disbursements, but there were many critics of the morality of lotteries and in June 1759, the Pennsylvania Assembly had gone so far as to adopt a law “for the more effective suppressing and preventing of Lotteries …” The law was challenged before the British crown and Parliament, Franklin was a virtual – and continuous – engine of civic involvement and improvement.

The Committee appointed to draw up the Papers necessary for Dr. Smith to take with him in order to solicit a Collection for the use of the Academy in Great Britain & Ireland delivered
in the Draught of a Commission or Power authorizing Dr. Smith in their Names to request Donations for the Academy together with an Address to the Proprietaries of the Province to countenance, advise, and assist Dr. Smith in making the said Collection & a Letter to Proprietor Thomas Penn praying Liberty to sell his Share of the Perkasie Manor which were all read, amended, and approved …

Provost Smith departed Philadelphia, bound for London, in January 1762. He would successfully raise the unprecedented total of £7,000 pounds on behalf of the College, Academy and Charitable School, but the campaign would take two and a half years and the Provost would not return to Philadelphia until June 1764. In the intervening years Rev. Dr. Francis Alison, the Vice Provost, assumed the Provost’s administrative duties and Rev. John Ewing (who would eventually succeed Smith as Penn’s Provost) assumed Smith’s teaching duties. This was the state of affairs at Penn in the spring of 1762.

In the eighteenth century, it was customary for the Trustees and Faculty to conduct a public examination of all students who had completed the collegiate course and applied for the degree of Bachelor of Arts. The Trustees’ minutes for April 1762 described in unusual detail the process of comprehensive examination for that year,

[Trustees] Present
Richard Peters, Thomas White
Alexander Stedman, William Allen
Thomas Cadwalader, Jacob Duchê

The Senior Students were examined by Dr. Alison & Mr. Peters in the Greek & Latin Languages; by Mr. Ewing and Mr. Williamson in Mathematicks; & by Mr. Peters & Dr. Alison in Logic, which took up the Forenoon.

P.M.

Present the same Trustees
Mr. Stedman & Mr. Ewing examined the Students in Natural Philosophy, & Dr. Alison & Mr. Peters in Moral Philosophy.

The Examination in all the Branches of Science was Strict & full, & the Students gave very clear and sensible Answers, much to the Satisfaction of the Trustees, & the Audience was pleased to express, at going away, very favorable Sentiments of the great Improvement made by the Students.

A few weeks later, the Trustees authorized public announcement of the upcoming Commencement of 1762,

Tuesday next, being the Eighteenth of May, is appointed for holding the Publick Commencement in the College of this City.

The Doors of the Publick Hall will be opened Half an Hour past Eight in the Morning, and the Exercises begin precisely at Nine o’clock; and in the Afternoon at Half an Hour past Two. Besides the Orations and Disputes by the Candidates, a Piece of Music will be perform’d, which, it is hoped, will give great Entertainment to the Audience.

Later in May, the Philadelphia newspapers printed the following report on the Commencement proceedings,

PH I L A D E L P H I A, May 27.

On Tuesday, the 18th inst., a public Commencement was held at the College in this City, in the Presence of a learned, polite, and very brilliant Assembly. Every Part of the public Hall was crowded with spectators. His Honor the G O V E R N O R, who is one of the Trustees of this Institution, was pleased to attend the whole Day. A great Number of the Clergy of different Denominations, together with many other Gentlemen of Learning, and the first Distinction, from the neighbouring Parts, were likewise present.

The following Gentlemen were admitted to Degrees at this Commencement, viz. Samuel Campbell, John Cooke, William

Henry Marchant, formerly a Student of this Institution, having pronounced an elegant, spirited English Oration upon the Study of the Law, was admitted to a Master’s Degree; Also the Rev. Mr. Morgan Edwards, the Rev. Mr. Joseph Mather, the Rev. Mr. John Simonton, and Mr. Isaac Smith, of Nassau College, now Student of Physic, to the Honorary Degree of Master of Arts; And Mr. Thomas Pollock, Tutor in the Academy, to the Honorary Degree of Bachelor of Arts.

Every Thing was conducted with the utmost Decency and Order. The Candidates acquitted themselves in every Part of their Exercises to the Satisfaction of all present, and have thereby derived considerable Honour to themselves and to the Institution.

150 YEARS AGO

The Commencements of 1862

In the academic year 1861-62, the Trustees, faculty, and students of the University of Pennsylvania were deeply concerned with and ever mindful of the terrible civil war being waged by the North and the South. The Trustees were determined, however, to carry the work of the University forward without interruption. The College, which drew the great majority of its students from the Philadelphia area, enrolled 124 regular students that year, which was consistent with enrollments in recent years. The Department of Medicine – founded in 1765 and since the 1820s, generally recognized as a great national school – enrolled 390 regular students, a forty-one per cent decline from just two years earlier. The Department of Law – re-established in 1850 and chiefly attended by those who intended to practice law in Pennsylvania – enrolled 54 regular students, a twenty-four per cent decline from the previous two years. Despite the overall decline in enrollment, the Trustees followed the traditional academic calendar and the faculty taught the regular curriculum.

The students in the College followed a four-year course leading to the degree of Bachelor of Arts or that of Bachelor of Science. The college year was divided into three terms or semesters, the first beginning in early October and the second ending at the end of May. Graduates of the Department of Law joined in the University Commencement with the graduates of the College.

For these reasons, Penn celebrated two commencements in 1862, first that of the Department of Medicine and later, that of the College and Department of Law. The Philadelphia newspapers described both ceremonies in considerable detail,
Rev. Dr. Schaeffer opened the exercises with a prayer.

Rev. Daniel R. Goodwin, D.D., Provost of the University, then conferred the Degree of Doctor of Medicine upon the graduates. The list was read off by Dr. Rogers, the Dean.

The names of the successful students are as follows …

[Ninety-one names followed, accompanied by the state of their permanent residence.]

Many of the graduates were the recipients of flowers, sent by their friends, which were arranged very neatly upon the stage.

The valedictory address was delivered by Joseph Leidy, M.D., Professor of Anatomy.

After a benediction, at the close the audience retired.

Three and one-half months later, Penn’s Trustees and faculty conducted – and the Philadelphia newspapers reported – the Commencement of 1862,

Annual Commencement of the University of Pennsylvania
Musical Fund Hall presented a brilliant appearance yesterday morning on the occasion of the Annual Commencement of the University of Pennsylvania. As usual, there was a large audience, the majority being ladies. Hassler’s band was in attendance and discoursed fine music, among which was some prepared by a member of the class. At ten o’clock the procession of graduates and professors formed at the College, Ninth street above Chestnut, and marched to the Hall. The services were opened with a prayer by the Provost, Rev. Dr. Goodwin, in which he besought a blessing on the occasion, and concluded with an appeal for a happy issue to the troubles of our country.

Mr. Charles C. Harrison then spoke the Greek Salutatory. The address was delivered with facility and appropriate gesture.

“Sunnyside” was the subject of the next speaker, Mr. George D. Budd. His remarks consisted of a eulogy upon the life and character of Washington Irving. Mr. Budd presented a graphic picture of the pioneer of American literature, and the close of his life at Sunnyside.

The next address was by Mr. Thomas F. Jones on “The Progress of Science in War.”

In the music which followed, the band struck up the Star Spangled Banner, when the whole audience rose, and remained standing during the rendition of the air.

Mr. Thomas Jones spoke on “The World’s Advancement,” contending that the progress of the world has been ever onward.

The subject of “Union” was discoursed upon by Mr. P. Frazer Jr.

Mr. George S. Chambers delivered an interesting address on “Radicalism.”

The degree of Bachelor of Arts was then conferred on the following members of the senior class:

[The names of twenty-five graduates then followed.]

Mr. Edward Starr had conferred on him the degree of Bachelor of Science.

The degree of Master of Arts was conferred on the following graduates of three years standing:

[The names of twenty-nine recipients of the semi-honorary degree of Master of Arts then followed.]

The following gentlemen had conferred on them the degree of Bachelor of Laws:

[The names of fifteen graduates then followed.]

After the conferring of degrees, Mr. Wm. Pepper Jr. delivered the valedictory address.

The Provost, Rev. Dr. Goodwin, announced the prizes awarded by the Faculty of Arts, during the past college year, for special attainments and exercises.

The benediction was then pronounced, and the affair closed.

150 YEARS AGO: College Hall on the Ninth Street Campus.
Penn moved to its second campus – the west side of Ninth Street, between Market and Chestnut Streets – in 1802. The University was then small enough to be accommodated in a single, if imposing structure, a building designed as the nation’s executive mansion and commonly known as the “President’s House.” The Federal government, however, moved to Washington, D.C. and Pennsylvania’s state government moved to Lancaster. In July 1800, the Trustees of the University purchased the President’s House and its Ninth Street grounds at public auction. The President’s House was home to both the College and the Department of Medicine until its demolition in 1828. The building pictured here was College Hall, designed by the celebrated Philadelphia architect William Strickland and built on the north side of the campus grounds in 1829. Penn’s Faculty of Arts – joined, after 1850, by its Faculty of Law – conducted undergraduate and legal education in this building until 1872, when the College moved to West Philadelphia.

Photograph, ca. 1870, by Robert Newell, Arch Street, Philadelphia. Collections of the University Archives and Records Center, University of Pennsylvania.
After the exercises, at 8 P.M., the class adjourned to a handsome collation. After the usual toasts, the following impromptu, written after the exercises had closed, by a member of the graduating class, was sung in full chorus:

On brothers, we’ve met for the last time, and here
Our paths once conjoined must now ever diverge.
At the end of our course and our college career
Into stern, varied life must our destinies merge;
And whatever we do, to ourselves we’ll prove true,
But a halo shed round our loved class – ‘62.

CHORUS – May our country remember us as of honor well due,
Our small band of brothers, the class – ‘62.

50 YEARS AGO
Commencement of 1962

The spring of 1962 was a time of great optimism at the University of Pennsylvania. In March, the Trustees and University administration achieved a major, long-term goal when the construction of Van Pelt Library was completed and more than 1,000,000 books began to be transferred into the new facility. In June, the Hospital of the University of Pennsylvania celebrated the opening of the new Ravdin Institute with a huge gala reception and dedication ceremony. In addition, the magnificent new building for Penn’s most recent intellectual innovation – the Annenberg School for Communication – was nearing completion and was scheduled to be dedicated in November. Penn, under the leadership of President Gaylord P. Harnwell, was on the move and all the indicators predicted that the coming years promised even greater things.

In the first week of May, the Trustees of the University gathered for their annual stated meeting. At that meeting – and after more than two years of consultation and consensus building – the Trustees adopted the “Integrated Development Plan,” an eighty-three-page statement of Penn’s educational mission and priorities, accompanied by the University’s long-term goals in physical plant expansion and the fundraising necessary to support it. It was a watershed moment in Penn’s twentieth-century history. The Integrated Development Plan essentially defined the work of the Trustees for the next eight years and much of our contemporary academic enterprise was the extraordinary result.

The academic year of 1961-62 was the first year in which Penn operated on its modern academic calendar. The start of the fall semester shifted back from the first of October to the week following the Labor Day holiday, which made it possible to close the fall semester just before the year-end holiday season. The start of the spring semester was likewise moved back, from the first of February to the early part of January, which thereby brought the semester to an end in the second week of May. In 1962, for the first time in more than a century, Penn held its annual commencement in May, a practice which has continued to the present day.

The Commencement of 1962 took place on Monday morning, 21 May, at the Municipal Auditorium (also known as Convention Hall), which stood on South Thirty-fourth Street, where the Perelman Center for Advanced Medicine stands today. The Academic Procession formed at 10 a.m. in the second floor Ballroom and at 10:30 a.m. it entered the main Auditorium. President Harnwell, the Trustees, other University officers, and those designated for the award of honorary degrees took the stage at the east end of the Auditorium, while the graduating students took their seats on the floor of the Auditorium. The audience occupied the elevated seats around the horseshoe-shaped perimeter of the Auditorium, both on the first floor and upstays on the balconies.

The Commencement of 1962 was unusual in that it featured two Commencement speakers. The first, who had been announced several months in advance of the ceremony, was President John F. Kennedy’s Secretary of the Treasury, Clarence Douglas Dillon (1909 – 2003). The second, who had accepted an invitation to speak only a few weeks ahead of time, was Félix Houphouët-Boigny (ca. 1905 – 1993), President of the Republic of the Ivory Coast (or Côte d’Ivoire) in West Africa.

The dual Commencement speakers were very different. Dillon was a study in contrasts: his paternal grandparents were poor Jewish immigrants from Poland who settled in Texas and became very successful in several different businesses; his father attended Harvard College, changed the family name to Dillon, and became wealthy as the head of the New York investment banking firm of Dillon, Read; Douglas Dillon himself was an active Republican, who served in the Eisenhower presidential administration as Ambassador to France and later as Under Secretary of State; in April 1965, when Dillon left the U.S. Cabinet, he said, “I am a moderate Republican. I do not believe that there are great differences between that kind of Republicanism and the objectives” of the Kennedy and Johnson administrations.

Houphouët-Boigny, on the other hand, was known for a single revolutionary cause: African independence from European colonial rule. He was a well-educated, practicing physician and successful rural planter, who entered Ivory Coast politics in 1944 as the co-founder of a group which advocated for local control of agricultural production, a group known as the African Agricultural Syndicate. Within a year, he transformed that organization into the Democratic Party of the Ivory Coast and was elected a deputy to the French National Assembly. Despite his resistance to French colonial policies, he maintained open communication and cordial relations with the French government. In 1956 the French prime minister, Guy Mallet, appointed him a minister-delegate, the first African in a French Cabinet. In August 1960, when the Ivory Coast became independent, Houphouët-Boigny was far and away the most popular leader in his homeland. He was elected President of the Republic of the Ivory Coast in November 1960 and served in that position until his death in December 1993.

“Penn: A Pantheon of Teaching, Research & Public Service”
Almanac
for 10 January 2012

Happy New Year and welcome back to Penn! As we embark on a new semester, I want to thank every member of the Penn community for continuing to distinguish this University as a place where individual passions fuel a collective purpose. Because of your commitment to collaboration, creativity,
and innovation, 2011 was a year filled with noteworthy achievements. I know 2012 will continue this trend.

In December, we proudly announced that Penn Med received $16.3 million – one of the largest individual gifts made to medical research in the United States in 2011 – to establish the Neuroscience of Behavior Initiative. In October, President Barack Obama presented professor Ralph Brinster of Penn Vet with the National Medal of Science, the highest honor bestowed by the United States government on scientists and engineers. Dr. Brinster is the first veterinarian, and the eighth Penn faculty member, to receive this prestigious award.

The American Physical Society elected five Penn faculty to its 2011 APS Fellowship class. They are Mark Devlin, Alan “Charlie” Johnson, and Joshua Klein of the Department of Physics and Astronomy; Feng Gai of the Department of Chemistry; and Howard Hu of the Department of Mechanical Engineering and Applied Mechanics.

Kudos go to Barbara Savage of the Department of History, who won the Grawemeyer Award in Religion for her extremely insightful book, *Spirits Walk Beside Us: The Politics of Black Religion*. And to James Corner, Chairman of the Department of Landscape Architecture, who was awarded the commission to design new public spaces for the Queen Elizabeth Olympic Park South in London.

These, of course, are but a few of the many remarkable achievements made by Penn faculty last year. I am especially proud that in 2011 the entire Penn community put into motion a comprehensive plan that will catapult forward our commitment to creating a university community that reflects and respects the richness of the world it serves by introducing Penn’s Action Plan for Faculty Diversity and Excellence. As an important step, Provost Vince Price has appointed John L. Jackson, Jr., the Richard Perry University Professor of Communications and Anthropology, to be Senior Advisor to the Provost for Diversity. I look forward to working diligently with Vince, John, and all of you to make Penn a place of even greater creativity, innovation, and inclusion.

Outside our classrooms, studios, and laboratories, we saw a transformation of Penn’s campus in 2011. In September, we celebrated the opening of Penn Park, the centerpiece of our Penn Connects long-range development plan, which weaves together our campus, West Philadelphia and Center City. We also officially opened the Perelman Center for Advanced Medicine and named the Perelman School of Medicine, with great gratitude to Raymond and Ruth Perelman for their historic gift.

The opening of Penn Park marked the completion of the first phase of Penn Connects and this year we will launch Penn Connects 2.0, the second phase of the plan. This second phase will include the opening of Golkin Hall, the beautiful new wing at Penn Law, the completion of the Singh Center for Nanotechnology, and the renovation of our historic ARCH building. We will continue with our transformative plans to construct a new College House between 33rd and 34th on Chestnut Street, and we will also enter the design phase of the new Neural Behavioral Sciences building.

Next fall, we will add even more green space to campus with the opening of Shoemaker Green in front of the Palestra. Our second college green will be a welcoming, tree-lined public commons with walkways and an inviting sitting area.

Overlooking Shoemaker Green will be the new Information Commons at Franklin Field, scheduled for completion this February. This new space will provide our students with a study area that offers unbeatable views of our bustling campus.

Finally, I know that you will join me in expressing gratitude to the many remarkable Penn alumni and friends who have been so avidly generous in their support that we reached our Making History campaign goal of $3.5 billion in 2011. In 2012, we will continue working toward all of our remaining priorities in the campaign, which include the funding of more endowed professorships (we’ve funded 100 so far in the campaign, but need more for our eminent faculty), student financial aid (which as you know is essential to making a Penn education affordable to outstanding students regardless of their financial circumstances), our high priority capital projects, and all the remaining School and Center priorities.

New Year’s is a time for reflection and resolution. I know that, as this exceptional community of dedicated scholars and teachers moves forward, we will continue to put Penn in the pantheon of teaching, research, and public service. Thank you for making this an academic home to which I am always happy to return. Have a great semester!

Amy Gutmann
President

Christopher H. Browne Distinguished Professor of Political Science

In 2012 the Penn Compact with its threefold theme – increasing access, integrating knowledge, and engaging locally and globally – leads the University of Pennsylvania into the future. It does so in partnership with the campus building plan, Penn Connects, and the $3.5 billion capital campaign, Making History. Working together these three initiatives promise to achieve President Gutmann’s objective for Penn: from excellence to eminence. Today, as the University community celebrates the Commencement of 2012, it is useful to reflect on the institution’s oldest traditions and to recognize that Penn is keeping faith with the best of its past.

Mark Frazier Lloyd
Director
University Archives and Records Center
Today – May 14, 2012 – is the University of Pennsylvania’s 256th Commencement. Penn traces its origins to a deed of trust executed in 1740 and is celebrating its 272nd birthday this year. President Amy Gutmann will confer bachelors, masters, and doctoral degrees upon some 6,000 graduates of the University’s 12 schools. Honorary degrees will be awarded to seven individuals of distinction in varied fields, as you will note on pages 17, 18 and 19 in this program.

The practice of sporting signs on caps and gowns as a form of public proclamation at Commencement dates to the early 1760s and recalls an even more ancient tradition, originating in the practice of medieval universities. Penn’s archives contain several 18th century broadsides, printed in Latin, which were distributed to Commencement guests along with the regular programs. The broadsides contain a series of propositions classified under various academic headings. Presumably, the graduating students were willing to defend these theses against any assertions to the contrary. On the eve of the Revolution, however, statements such as “the rights of the people are as divine as the rights of their rulers” must have met with widespread sympathy.

ACADEMIC CEREMONY AND REGALIA

Commencement exercises at American universities and colleges traditionally are composed of three essential elements: the Academic Procession, the conferring of degrees, and the Commencement address. This practice has been codified since 1895, when a national conference on academic costume and ceremony was proposed and a plan known initially as the “Intercollegiate System” was formally adopted. The Trustees of the University of Pennsylvania incorporated this code in the Statutes of the University in November 1896. Now under the aegis of the American Council on Education, the “Academic Costume Code and Academic Ceremony Guide” was revised in 1932 and 1960.* Throughout the 20th century, Commencement at Penn has, with minor modifications, followed the dictates of the code and its revisions.

By 1896, however, Penn had been granting degrees for nearly 140 years. Like other American colonial colleges, Penn borrowed its 18th century Commencement rituals directly from the English universities. In England the history of academic dress reaches back to the early days of the oldest schools. As early as the second half of the 14th century, the statutes of certain colleges prohibited “excess in apparel” and required the wearing of a long gown. It is still an open question as to whether academic dress finds its sources chiefly in ecclesiastical or in civilian dress. It is often suggested that gowns and hoods were the simplest, most effective method of staying warm in the unheated, stone buildings which housed medieval scholars. In any case, academic regalia had evolved to contemporary familiarity by the time Benjamin Franklin was awarded an honorary Doctor of Laws by the University of St. Andrews in 1759.

TRADITIONS AND CURRENT PRACTICE

AT PENN

In April 1887, on the recommendation of a committee of the faculty, the Trustees adopted the “Pennsylvania’ System of Academic Costume.” The colors and trimmings of hoods and caps were regularized according to faculty and degree. Beginning with the Commencement of 1887, the “Pennsylvania’ System” was published in each year’s program and adherence to its rules was expected of trustees, faculty, and students alike. Beginning in 1896, the “Pennsylvania’ System” was superseded by the “Intercollegiate System,” which has continued in effect to the present time.

The gowns used in American academic ceremonies vary according to the highest degree awarded to the wearer. The gown for the bachelor’s degree has pointed sleeves; it is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut and the front has an arc cut away. The masters gown may be worn open or closed. The doctoral gown is a more elaborate costume faced down the front with black velvet and across the sleeves with three bars of the same; these facings and crossbars may be of velvet of the color distinctive to the field of study to which the degree pertains. The doctoral gown has bell-shaped sleeves and may be worn open or closed. Some institutions have authorized doctoral gowns in colors other than the customary black; holders of the University of Pennsylvania doctorate may wear red and blue gowns.

The hoods are lined in silk with the official color or colors of the college or university which granted the highest degree held by the wearer; more than one color is shown by division of the field color in a variety of ways, such as by chevron or chevrons. The binding or edging of the hood is in velvet, with widths of two inches, three inches, and five inches for the bachelors, masters, and doctoral degrees, respectively. The color of the border indicates the field of study to which the degree pertains. University of Pennsylvania graduates wear a hood lined in red with a blue chevron. The mortarboard cap is standard, though soft square-topped caps are permissible. Recipients of doctorates may wear a gold tassel fastened to the middle point of the top of the cap; all others wear black.

Degrees shall be conferred today according to the following order:

- Arts & Letters, white
- Science, golden yellow
- Business Administration, mustard
- Nursing, apricot
- Medicine, green
- Law, purple
- Fine Arts, brown
- Dental Medicine, lilac
- Veterinary Medicine, gray
- Education, light blue
- Social Work, citron
- Philosophy, dark blue

ACADEMIC PROCESSION
The order for today’s Academic Procession is as follows:

- Mace Bearer
- President and Provost
- Vice Chair of the Board of Trustees
- Commencement Speaker
- Candidates for Honorary Degrees
- Deans
- Trustees
- Officers of the University
- Faculty
- Overseers
- Visiting Dignitaries

UNIVERSITY MACE
The Secretary of the University carries the University mace, the symbol of authority of the University, at the head of the Academic Procession. It was a gift of the family of William Murray Gordon, M.D. 1910. It is adorned with the seal and arms of the University, the Penn and Franklin coats-of-arms, a depiction of the Rittenhouse orrery, and a thistle symbolizing the early ties of the University with Scotland.

PRESIDENT’S BADGE OF OFFICE
The President wears as a badge of office a silver medallion of which one face is engraved, like the mace, with the University seal. The obverse of the President’s medal bears the “orrery seal,” designed in 1782 by Francis Hopkinson, A.B. 1757, a Signer of the Declaration of Independence. The medal, suspended on a chain composed of silver links, was given by the late Trustee Thomas Sovereign Gates, Jr., A.B. 1928, LL.D. 1956, on the occasion of Sheldon Hackney’s inauguration as President in October 1981.

UNIVERSITY SEAL AND SYMBOLS

SEAL OF THE CORPORATION
The Trustees of the University have an official seal that is, in effect, the signature of the corporation. It had its origin at a meeting of the Board of Trustees in 1755 with Benjamin Franklin as Chairman. Though the seal underwent changes over the years, the most recent design, approved in 1932 and adopted in 1933, returned it to virtually its original form.

The seal is composed of seven books stacked on a slanted desk top with the books bearing the following titles, representing the curricula of the day: Theolog, Astronom, Philosoph, Mathemat, Logica, Rhetorica, Grammatica. On the periphery of the stack of books appears the University motto, Leges Sine Moribus Vanae, and the whole is encircled with the inscription Universitatis Pennsylvaniensis.

PENN COAT-OF-ARMS
The Penn coat-of-arms was derived by combining the coat of arms of Benjamin Franklin and that of William Penn’s family. The dolphin on the red chief was part of Franklin’s coat-of-arms and the three silver plates on a blue chevron were a part of Penn’s. The two were combined on a white shield along with two open volumes representing the University’s educational purpose.

MOTTO:
LEGES SINE MORIBUS VANAЕ
The motto of the University, Leges Sine Moribus Vanae, means “Laws without morals are useless.” It comes from the longer quotation from Horace, “Quid leges sine moribus vanae proficiunt?” the sense of which is “of what avail are empty laws without (good) morals?”

SCHOOL COLORS
Eighteenth century American academic institutions did not have colors. The earliest known representation of the combined Penn colors, red and blue, is on the incised lid of the 1871 College Hall cornerstone.

One legend traces their origins to an early track meet at Saratoga, New York, between Penn, Harvard, and Yale. When asked by the officials what colors would be representing the Penn team, the Pennsylvania captain reportedly replied, “We’re going to be wearing the colors of the teams we beat,” i.e. Harvard Crimson and Yale Blue. We shall assume that Penn was victorious and thus remained loyal to the Red and Blue.
SCHOOL OF ARTS AND SCIENCES (1755)
The School of Arts and Sciences (SAS) is the direct descendant of the College of Philadelphia, where Benjamin Franklin established the first modern arts and sciences curriculum in the English colonies. Undergraduate programs for men date to the chartering of the College in 1755; the College of Liberal Arts for Women was founded in 1933. The Graduate School was established in 1882 with the appointment of a Faculty of Philosophy. The College of Liberal and Professional Studies (lifelong learning) traces its roots to 1892. The School of Arts and Sciences was born in 1974 with the merger of the College of Arts and Sciences, the College for Women, the Graduate School, and four social science departments from Wharton. Today SAS is the largest of the University’s 12 schools, providing a liberal arts education for all Penn undergraduates and supporting graduate studies, basic research, and continuing education across the full range of the humanities, natural sciences, and social sciences. The School has 26 departments with 472 standing faculty, 21 research centers, seven interschool institutes, and 10,000 students.

SCHOOL OF MEDICINE (1765)
Established in 1765 as the nation’s first medical school, Penn’s School of Medicine, now the Raymond and Ruth Perelman School of Medicine, continues a rich tradition of providing pre-eminent training and education. Today, the Perelman School of Medicine at the University of Pennsylvania, a leader among the nation’s medical schools, is committed to the highest standards in education, research, and patient care. It is continuously engaged in long-range strategic planning and implementation, focusing on programs and facilities that will take it well into the 21st century. In the current academic year, the School has 28 departments, 23 interdisciplinary centers and institutes, and over 1,900 full-time faculty members. It educates 725 M.D. students, 185 M.D./Ph.D. students, and 735 Ph.D. students, and trains more than a thousand residents and fellows. Over the last decade, the Perelman School of Medicine has consistently ranked among the top recipients of monies granted by the National Institutes of Health.

LAW SCHOOL (1790)
Legal education at Penn began in 1790 with a series of lectures on law by the University’s first law professor, James Wilson, a signer of the Declaration of Independence and one of the original six justices of the Supreme Court of the United States. After a long hiatus, instruction in law was re instituted in 1850 by George Sharswood. Today the hallmarks of the Penn Law experience are a cross-disciplinary, globally-focused legal education taught by preeminent scholars that starts at the Law School and extends throughout the University. More than 70 percent of Law School faculty hold advanced degrees beyond law and close to 50 percent have joint appointments and affiliations, adding a broad perspective to the classroom. Law School students augment their legal education with classes throughout the University and earn certificates and joint degrees from many of the graduate and professional programs. In the 2011-2012 academic year the Law School has 914 students, 74 faculty including 10 associated faculty and clinicians, one senior fellow, three secondary appointments, 16 visiting faculty and fellows, and 104 practitioners/lecturers. The Law School awards four degrees: Juris Doctor

SCHOOL OF ENGINEERING AND APPLIED SCIENCE (1852)
The School of Engineering and Applied Science (SEAS) is one of the oldest in the United States, tracing its beginnings to the establishment of the School of Mines, Arts and Manufactures in 1852. The first graduate of the School received a Bachelor of Science degree in 1854. Since that time, the School has grown into a center of excellence in the creation of technology and in technology education. Its spirit of innovation led to the creation in 1946 of ENIAC, the first all-electronic, large-scale, general-purpose digital computer, making SEAS the birthplace of the computer age. Today, Penn Engineering offers a wide range of undergraduate and graduate programs, including the first alternative liberal arts program based in an engineering school. Penn Engineering is particularly distinguished by its interdisciplinary, cross-school programs such as Management and Technology, Digital Media Design, Biotechnology, and the Singh Program in Market and Social Systems Engineering. Penn Engineering currently has 110 standing faculty, approximately 1,500 undergraduate students, 1,000 graduate students, four research institutes, ten research centers, and one regional institute.

SCHOOL OF DESIGN (1869)
Although the School of Design dates its founding from 1890, architecture courses were first offered at the University of Pennsylvania in 1869, making Penn’s architecture program the second oldest in the United States. In 1921, the Department of Architecture joined with the Department of Music and Fine Arts to create an independent undergraduate School of Fine Arts modeled on the French École des Beaux Arts. In 1958, the School was renamed the Graduate School of Fine Arts, reflecting the shift to graduate degree offerings in architecture, city and regional planning, landscape architecture and fine arts. The triumvirate of architecture, landscape architecture and city planning shaped the core of the School in the 1950s and 1960s. In the 1980s, a program in historic preservation was added. Today, the School provides a rich environment for the study of the arts, architecture, landscapes and urbanism. Its opportunities now include undergraduate study in fine arts, architecture and digital media design. As a more accurate description of the School’s major concerns and advancements made across a variety of fields, the School was renamed, in 2003, the School of Design. The School has a standing faculty of 35, approximately 130 lecturers and associated faculty, and more than 600 students.

SCHOOL OF DENTAL MEDICINE (1878)
Established in 1878 as the Dental Department of the University of Pennsylvania, the School of Dental Medicine is among the oldest university-affiliated dental schools with a history deeply rooted in forging precedents in dental education, research, and patient care. In 1897, Thomas W. Evans, a Philadelphia native who spent most of his life in France as the dentist to European nobility, left his estate to create a dental school that would be "second to none.”, establishing the Thomas W. Evans Museum and Dental Institute at Penn in 1915. The Evans Building remains the site of much of the School’s clinical and classroom instruction. The dental campus also includes the Robert Schattner Center and the Leon Levy Center for Oral Health Research, home to the School’s extensive research activities. Penn Dental Medicine is a major provider of dental care in its clinics and faculty practices, and through its outreach programs, students serve approximately 14,000 area residents each year. The School awards Doctor of Dental Medicine, Master of Science in Oral Biology, and Doctor of Science in Dentistry degrees and trains residents in the specialties of endodontics, oral medicine, oral and maxillofacial surgery, orthodontics, pediatrics, periodontics, periodontics/orthodontics, and periodontal prosthesis. This academic year, Penn Dental Medicine has 521 DMD students, 91 postdoctoral residents, 21 postdoctoral researchers and fellows, and a total of 450 faculty members, including 49 standing faculty.
WHARTON SCHOOL (1881)
The Wharton School of the University of Pennsylvania – founded in 1881 as the first collegiate business school – is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. The most comprehensive source of business knowledge in the world, Wharton bridges research and practice through its broad engagement with the global business community. Its five academic divisions, has 36 standing faculty, various research centers, and slightly over 2,000 students. Originally an undergraduate education school and, for many years, a five-year professional school, GSE now provides advanced professional qualifications for educators across the lifespan and offers courses that lead to practice- and research-focused masters and doctoral degrees. The School also offers executive doctoral degree programs and a broad schedule of continuing education courses.

SCHOOL OF VETERINARY MEDICINE (1884)
Penn’s School of Veterinary Medicine is one of the world’s premier veterinary schools. Founded in 1884, the School was built on the concept of Many Species, One Medicine. A pioneer since its inception, Penn Vet has led the way in such areas as infectious disease research, germ cell biology, animal transgenesis, comparative oncology, and comparative medical genetics. It has also successfully integrated scholarship and research with all aspects of veterinary medical education. The School’s strength in basic sciences, immunology and mathematical modeling are valuable assets for developing strategies to rapidly detect and control the spread of new infections and for improving and developing vaccines that effectively protect animals. In Philadelphia, on Penn’s campus, are the Matthew J. Ryan Veterinary Hospital for companion animals, as well as classrooms, research laboratories and the School’s administrative offices. The Vernon and Shirley Hill Pavilion is home to state-of-the-art classrooms and research facilities for the School. The large animal facility at New Bolton Center, in Kennett Square, Pa., includes the George D. Widener Hospital for the care of horses and food animals, diagnostic laboratories serving the agricultural industry and research facilities to determine new treatment and diagnostic measures for large animal diseases. Penn Vet has more than 125 standing faculty and accepts approximately 125 students per year for the four-year program.

GRADUATE SCHOOL OF EDUCATION (1914)
The Graduate School of Education (GSE) is a leader in the production of education research and the preparation of education practitioners. GSE is unique among schools of education in its development of custom degree programs, its extensive collaborations in Philadelphia, and its rich collaborations across Penn. The School is organized into five academic divisions, has 36 standing faculty, various research centers, and slightly over 2,000 students. Originally an undergraduate education school and, for many years, a five-year professional school, GSE now provides advanced professional qualifications for educators across the lifespan and offers courses that lead to practice- and research-focused masters and doctoral degrees. The School also offers executive doctoral degree programs and a broad schedule of continuing education courses.

SCHOOL OF NURSING (1935)
Nursing Education at Penn began in 1886 when the Hospital of the University of Pennsylvania started a nurse training program. In 1935, the Trustees of the University of Pennsylvania established a nursing degree program within the School of Education, and in 1950 the School of Nursing was established. The Master of Science in Nursing program was instituted in 1961, the Doctor of Nursing Science program in 1978, and the Doctor of Philosophy program in 1984. These innovations and a curriculum which progressively reflects changing health care delivery patterns have advanced the School into the first rank of American schools of nursing. The School has two departments, Biobehavioral and Health Sciences and Family and Community Health. It is widely recognized for its leadership in nursing research and currently houses six research centers with foci in health outcomes and policy research, biobehavioral health sciences, nursing history, health equity, aging, and transitions in health. It also has a global reputation for innovations in nurse-managed clinical practice and is a World Health Organization Collaborating Center for Nursing and Midwifery Leadership. The School of Nursing has 56 standing faculty and 1,086 students.

ANNENBERG SCHOOL FOR COMMUNICATION (1959)
Founded through the generosity and vision of diplomat and philanthropist Walter Annenberg, the Annenberg School for Communication at the University of Pennsylvania is devoted to furthering our understanding of the role of communication in public life through research, education and service. At the School’s founding, Ambassador Annenberg identified its unique mission. “Every human advancement or reversal can be understood through communication,” he said. “The right to free communication carries with it responsibility to respect the dignity of others - and this must be recognized as irreversible. Educating students to effectively communicate this message and to be of service to all people is the enduring mission of this school.” Annenberg is nationally ranked as the best graduate program in mass communication, health communication, political communication, and culture, society and communication. The Annenberg School has 20 full-time faculty, over 80 graduate students and more than 200 undergraduate students. The school offers the degree of Doctor of Philosophy, and runs an undergraduate program through the College of Arts and Sciences. The School is home to the Annenberg Public Policy Center, the Center of Excellence in Cancer Communication Research, the Center for Global Communication Studies, the Scholars Program in Culture & Communication, and the Institute for Public Service, among many additional projects pursuing innovative communication research and services.
RUZENA BAJCSY

Born in Czechoslovakia, the tragedy of World War II left you an orphan at age 11. Drawing on your inner strength and thirst for education, you persevered and thrived. When the path to teaching was blocked for an independent young woman unwilling to subscribe to prevailing Marxist ideology, you followed your father’s footsteps and turned to engineering. Paying your way by maintaining the school’s first computer, you were the first woman to earn an electrical engineering Ph.D. at the Slovak Technical University in Bratislava. Your studies then led you to a second Ph.D. at Stanford University in the emerging field of computer science. In 1972 you arrived at Penn.

In your thirty years on Penn’s faculty, there were many more “firsts.” You were the first and at times the sole woman in the Department of Computer and Information Science, and the first woman as its chair. In 1978, you founded Penn’s General Robotics and Active Sensory Perception Laboratory (GRASP), one of the first of its kind and one of the world’s premier robotics research centers.

In developing the concept of “active perception” in robotics, you had the insight to command the machines: “Don’t see … look. Don’t touch … feel.” In teaching them to learn as humans do – actively seeking information and evaluating different perspectives – you revolutionized the field.

Your interdisciplinary research and leadership led to many other advances, including important developments in digital medical imagery. In national service as the first woman to head the National Science Foundation’s Computer Information Science and Engineering directorate, you brought your visionary guidance to bear on national technology policy as well.

It is fitting that Discover magazine named you one of the 50 most important women in science and that you hold membership in both the National Academy of Science Institute of Medicine and the National Academy of Engineering.

Today, you continue to teach, mentor and explore as Director Emerita at the Center for Information Technology Research in the interest of Society and at the University of California – Berkeley on projects of high societal relevance as varied as homeland security, energy conservation and health care.

For your unmatched contributions in computer science and robotics and as a pioneering example for women in the sciences, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Ruzena Bajcsy, the degree of Doctor of Sciences, honoris causa.

GEOFFREY CANADA

In your compelling memoir Fist Stick Knife Gun, you recounted a South Bronx childhood of inner city streets marked by poverty and defined by the rituals and codes of violence. Despite these challenges, with your family’s support and by your own hard work, you succeeded academically, earning a bachelor’s degree from Bowdoin College and a master’s degree in education from the Harvard Graduate School of Education.

Returning years later to your old neighborhood, you were struck by how little things had changed for the children there. So you began to plan. Driven by a deep belief that all children can succeed, regardless of race, wealth or neighborhood, you envisioned a comprehensive network to educate children and build a community that would foster success. You have realized that vision by creating a continuous “safety net” of programs for children and providing a counter-balance to the negative influences they must navigate.

What began as a one-block pilot program in the early 1990s has grown to encompass 100 blocks in New York’s Harlem neighborhood. Today, as President and CEO of the Harlem Children’s Zone, you and your staff of 650 help 11,000 children and their families overcome obstacles to success through a network of educational, health, and social initiatives. With services that begin before birth and continue through college, the Harlem Children’s Zone has been called “one of the most ambitious social-service experiments of our time,” and has become the template for President Obama’s Promise Neighborhoods program.

In testament to your untiring efforts and dedication, as well as to those who share your vision, no less than 9.0 percent of the 2011 high school seniors in your after-school programs went on to college.

Your passion and advocacy for the success of the Harlem Children’s Zone—and to the possibilities it holds for children in disadvantaged communities everywhere—have drawn visiting delegations from around the world. In recognition of your leadership for effective educational reform, TIME magazine named you one of the world’s 100 most influential people in 2011.

For your steadfast vision and the hope of success in education, and therefore in life, that you have given to millions of children, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Geoffrey Canada, the degree of Doctor of Humane Letters, honoris causa.

AKIRA ENDO

Your scientific achievements show us how the integration of knowledge across disparate fields can benefit the human condition.

As a boy living on a farm in Japan, you were intrigued by the power of nature. Inspired by the great discoveries of Sir Alexander Fleming, you wondered what other natural substances could be harnessed to serve humanity. Your curiosity led you to Tohoku University, where you studied agriculture and biochemistry. You continued your quest as a research scientist at Sankyo Company, where, again following Fleming’s example, you explored the potential of fungal enzymes.

During a fellowship at New York’s Albert Einstein College of Medicine in the 1960s, you made the brilliant leap of imagination that would one day change the medical world. Confronted with the newly understood nature of cholesterol and its devastating threat to human health, you wondered if fungal enzymes like those you had been studying could hold the solution to combating heart disease. Returning to your lab at Sankyo, you dedicated two years to tirelessly cultivating thousands of fungal strains and testing their effects on cholesterol. Your relentless search finally uncovered mevastatin, a compound that did indeed inhibit cholesterol’s synthesis.

The revolutionary statin drugs that arose from your discovery are now among the most-prescribed medications in the world. Your breakthrough has transformed the prevention and treatment of heart disease and has affected the lives of untold millions.

This enormous feat has earned you accolades around the world. You hold the Lasker-DeBakey Clinical Medical Research Award, the Japan Prize, the Heinrich Wieland Prize, the Warren Alpert Foundation Prize, the Massry Prize, and the Toray Science and Technology Prize. You are a member of the National Academy of Sciences and were named a Person of Cultural Merit by the government of Japan. This morning, we are delighted to bestow upon you an additional honor.

For relentlessly probing the mysteries of both mycology and human biochemistry, and for extending countless lives around the world, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Akira Endo, the degree of Doctor of Sciences, honoris causa.
PETER D. LAX

Your interweaving of the theoretical and the applied has profoundly influenced mathematics in our age. Your discipline’s vernacular reflects the far-ranging importance of your studies, including the Lax Equivalence Theorem, the Lax-Friedrichs scheme, and the Lax Entropy Condition. Endeavors as varied as airplane design, oil exploration, and weather prediction have been influenced by your life’s work.

Your extraordinary career began during the last months of World War II. As a young serviceman and recent refugee from Hungary who possessed a considerable gift for mathematics, you were sent by the United States Army to the Los Alamos National Laboratory. There, at the age of 18, you worked on the history-making Manhattan Project alongside some of the world’s top thinkers.

After earning your doctorate at New York University, you returned briefly to Los Alamos then joined the faculty of New York University, where you had done your undergraduate and doctoral work. You went on to lead NYU’s prestigious Courant Institute of Mathematical Sciences. Always a champion of collaboration, you worked to foster unity among scholars of mathematics and engineering and to enable pure and applied mathematics to be carried out side by side. You also shepherded the emerging field of computational mathematics. Your visionary stance as chairman of the National Science Board’s Lax Panel persuaded the government to put supercomputers into the hands of universities and accelerated this vital field as never before.

The National Medal of Science, the Wolf Prize, the Chauvenet Prize, and the Abel Prize are some of the honors that attest to the brilliance of your work. You have served as president of the American Mathematical Society and have been elected into the American Philosophical Society and have been awarded the National Medal of Science, the Wolf Prize, the Chauvenet Prize, and the Abel Prize. You have served as a member of the National Academy of Sciences and have been awarded the National Medal of Science. You have also served as a member of the National Science Board’s Lax Panel. You have been awarded the National Medal of Science and the Wolf Prize.

Your contributions to computational mathematics have had a profound impact on a wide range of fields, from engineering to computer science. Your work on the Lax Equivalence Theorem and the Lax-Friedrichs scheme has been instrumental in the development of numerical methods for solving partial differential equations. Your research has also had significant applications in areas such as fluid dynamics and geophysical fluid dynamics.

You have been recognized for your contributions to mathematics and science with numerous awards and honors, including the National Medal of Science, the Wolf Prize, the Chauvenet Prize, and the Abel Prize. You have been elected as a member of the National Academy of Sciences and have served as a member of the National Science Board’s Lax Panel.

JOHN R. LEWIS

As the son of Alabama sharecroppers in a segregated South, you longed for the time when all Americans would be free to live and work side by side. As a teenager, you heard the words of Martin Luther King, Jr., on the radio, and you were galvanized.

You launched your heroic crusade at the age of 19 by leading a lunch counter sit-in. You went on to form and eventually lead the Student Nonviolent Coordinating Committee, risking your life for your country on the Freedom Rides and again in leading the march across Edmund Pettus Bridge in Selma. The 1963 March on Washington, which you helped shape, left an indelible mark on this nation, as did the remarks you made as the event’s youngest and most fiery speaker. Later, the Voter Education Project, which you directed, forever changed the country’s voting landscape by giving voice to millions of new voters of diverse backgrounds.

You worked to transform government from within as the director of the federal volunteer agency ACTION, and as a member of the Atlanta City Council. For the last quarter-century, you have served the people of Georgia as a member of the Fifth Congressional District, and your strong moral fiber has earned you a reputation as the conscience of the Congress.

Your heroism has been recognized with the Presidential Medal of Freedom, the Martin Luther King, Jr., Non-Violent Peace Prize, the NAACP Spingarn Medal, and the only John F. Kennedy Profile in Courage Award for Lifetime Achievement ever to be granted by the John F. Kennedy Library Foundation. Your courage, however, has not always been so widely applauded. In the 1960s, you endured disparagement, arrest, and brutal beatings for your beliefs, but you never abandoned your cause. Thanks to your lifetime of fearless dedication, every one of the graduates sitting before you today has the chance to pursue his or her dreams to the fullest.

For your fervent defense of the human rights of all Americans regardless of personal cost, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, John R. Lewis, the degree of Doctor of Laws, honoris causa.

DAVID H. PETRAEUS

Scholarship and service to country are the twin underpinnings of your valiant career.

You excelled academically at the United States Military Academy, where you later returned as a professor. You also shined at the U.S. Army Command and General Staff College, where you were the top graduate, despite being the youngest and lowest-ranked officer in your class. Your doctoral work at Princeton University was visionary. Never afraid to depart from accepted truths, you took issue with U.S. strategy in Vietnam, positing that in conflicts involving insurgency, America should, at any cost, protect civilians and engender stability. Your dauntless service in Central America, Haiti, and Bosnia underscored this ideal. Later, as the supreme leader of American forces in Iraq and Afghanistan, you implemented your theories before a watching world. Against all odds, you worked to protect the population and launched thousands of reconstruction projects, trained security forces, built roads, and reopened schools.

In between these feats, you commanded the Army’s Combined Arms Center at Fort Leavenworth and reshaped Army doctrine. Saying you wanted to teach soldiers how to think, not what to think, you redefined the Army’s training curriculum to do just that. Your “Petraeus doctrine”—a manual for countering insurgency that you set forth during this command—is now changing how the Army thinks and how it wages battle.

As the most prominent general of our day, you were decorated with the Defense Distinguished Service Medal, the Army Distinguished Service Medal, the Bronze Star, the State Department Distinguished Service Award, the NATO Meritorious Service Medal, and the German Order of Merit. Last year, when President Obama chose you to head the country’s Central Intelligence Agency and you ended your distinguished military career, the Chairman of the Joint Chiefs of Staff rightly said of you, “You now stand among giants, not just in our time, but of all time.” He counted you among military legends such as General Grant, Admiral Pershing, and General Eisenhower, whose valor bequeathed to us the country we know today.

For unyielding courage of mind and body and an unwavering devotion to building up rather than tearing down, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, David H. Petraeus, the degree of Doctor of Laws, honoris causa.
ANNA DEAVERE SMITH

Your talents as playwright and performer have shone an illuminating spotlight on the realities of the American experience.

For decades, you have traversed the country in search of American character, interviewing thousands of people and incorporating them into your acclaimed one-woman shows. Your vivid portrayals of these real people, using their own words, have given audiences on Broadway and across the United States an extraordinarily honest insight into the human condition.

Your unique style of documentary theater has enabled us to do what is so rarely possible in mainstream America – view issues of social justice through the eyes of those most affected. Your celebrated plays “Twilight Los Angeles,” “Fires in the Mirror,” and “Let Me Down Easy” have shown us the very personal consequences of racial tension and healthcare inequalities as experienced by the people you portray. Through your plays, you uphold the dignity of every individual and show how injustice diminishes us all. Your books and other writings resound with lessons of similar urgency.

As consequential as your works have been, your influence has not been limited only by the fruits of your own imagination. As a drama professor at New York University and other venerable institutions across the country, you have inspired a new generation of artists to change the world. You created the Institute on the Arts and Civic Dialogue at Harvard University to form a community of artists working to illuminate social concerns. Today, your Anna Deavere Smith Works foundation spurs artists to follow your lead by using their own gifts as vehicles for social justice. And as an actor you have brought to life a wide range of memorable characters in some of television’s best dramas, including National Security Advisor Dr. Nancy McNally in The West Wing, hospital administrator Mrs. Akalitus in Nurse Jackie, and D.A. Kate Brunner in The Practice.

Your courageous artistic accomplishments have earned you Tony nominations, Obie Awards, a Drama Desk Award, a Pulitzer Prize nomination, the Helen Hayes Award, the NAACP Award, and a MacArthur “Genius” Award. We are delighted to bestow an additional honor upon you this morning.

For creating a new form of drama that has opened eyes, minds, and hearts to the truths of contemporary America, the Trustees of the University of Pennsylvania are honored and pleased to confer upon you, Anna Deavere Smith, the degree of Doctor of Humane Letters, honoris causa.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.

Candidates for the degrees of Master of Arts, Master of Science or Doctor of Philosophy can be found under the Graduate Faculties listing.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student's name herein does not necessarily mean that the person has not been awarded a Penn degree. The student's transcript is the official record of the University.

Candidates for the degrees of Master of Arts, Master of Science or Doctor of Philosophy can be found under the Graduate Faculties listing.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.

As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The appearance of a name in this program should not be construed as an indication that the person has received a degree from the University of Pennsylvania. Conversely, the absence of a student’s name herein does not necessarily mean that the person has not been awarded a Penn degree. The student’s transcript is the official record of the University.
Note: As final action cannot always be taken by the time this program goes to press, these lists of degree and prize recipients are tentative only. The student’s transcript is the official record of the University.
