THE BOOK OF THE CLASS OF 1852
UNIVERSITY OF PENNA.
Sir,

I sent to you a few weeks ago the "Clap book" of the Clap of 1852. As I consider myself partly responsible for a book which has been after so long a time entrusted to my care, I would be glad to know whether you received it.

If it would not be too much trouble for you, an answer would much oblige your obedient serv.

John Thomas Carpenter.

I was born the 27th day of June 1833, at Pine Hill, the family residence, in Potterville, Schuylkill Co. Pennsylvania, being the eldest child of J. H. Stratton Carpenter M.D. (Univ. Penn.) one of the Founders of the Med. Society of the State of Penn, & member of the American Medical Association; and of Camilla, his wife, daughter of John Sanderson, Professor of Ancient Languages in the Central High School; Author of the Lives of the Signers of the Declaration of Independence, the American in Paris & other works.

By my father's side I am descended from Samuel Carpenter, an eminent merchant of Philadelphia & intimate personal friend of Wm. Penn.

I was baptized Sept 8th 1839 by the Rev. Alfred A. Miller M.A. (Univ. Penn.) Rector of Trinity (P. E.) Church Potterville.

My education was commenced & carried on for several years at home, until in the Autumn of 1842 I entered the Potterville Academy, then conducted by the Rev. A. D. Putman, sometime member of Congress from this district composed of Schuylkill & neighboring counties.

I continued in this institution until 1850, having spent the last two years under the immediate instruction of Daniel Kirkwood, LL.D. (Univ. Penn.) now Professor of Mathematics & Astronomy in Delaware College, & Author of the celebrated astronomical laws known as "Kirkwood's Analogies."

While in this institution, by appointment of its teachers, I delivered an
oration on the "Ancient Languages", at a public celebration made upon the completion of new building.

March 13th, 1849, I was confirmed in Trinity Church, Pottsville, by the Rev. Mr. Potter, Bishop of Penn.

Matriculated in University College as junior, at the 2nd (Senior) term 1850-1851.

Immediately on entering College I became connected with the Heliosopheric Society, & just before graduation had the honor of being among those who constituted a chapter (Pennsylvania Alpha) of the P.B.K. Society within our University.

Being appointed to the Speakers' List at the close of the 1st (Michaelsen) term junior year, I wrote an oration on the subject "Seniors", which was not delivered on account of ill health.

Graduated at the commencement, July 24th, 1852, with B.A. degree, & as the second of his first class honors, when I delivered the Greek Salutatory Oration.

At the class meeting, held immediately before graduation, I was placed upon the class committee; and subsequently, by vote of the committee, entrusted with the compilation of the Class Book, (in conjunction with W.F. Wells) and

July 1852, I entered as student of Medicine in the office of my father, Dr. J.J. Carpenter, and matriculated in the Med. Dept. of the Univ. of Penn, Sept. 29th, 1853, at the opening of the session 1853-1854.

Novr. 1st, 1853

John J. Carpenter, B. A.
On Saturday, March 31st, the degree of M.D. was conferred on him by Henry Welshak, L.L.D., Provost of the University.

On Tuesday, July 3rd, 1855, he received the degree of A.M.

Married: December 4th (Tuesday) at 6:30 A.M. by the Rev. Washburn to Eliza, daughter of Charles M. Hill of Pottsville.

He made many contributions to medical literature, besides reports.

He died at Pottsville, Pa., January 22, 1899.
Dorsey Cox.

I was born, on a farm, named, after the family, Coxville, in Bedford County, Pennsylvania, on the 20th day of May, in the year of our Lord 1832, of Samuel Cox, for some time first President of the Schuylkill and Navigation Company, twin brother of Samuel Cox, and third Son of John Cox, and Elizabeth Physic, eldest daughter of John Physic D.D., against Professor of Vagary in the University of Pennsylvania, in 1807, afterwards Professor of materia medica, and afterward Professor of Anatomy in the same Institution.

I am my father's third Son, but first child of the second of his second marriage.

At the early age of 4 months, I removed from Coxville to Spring Hill, near Hollidaysburg, and immediately back to Poundale. I was baptized, in September 1832, in All Saints Church, Hollidaysburg, by the Rev. Mr. Sheets, of the Protestant Episcopal Church.

In the fall of 1836, removed to Philadelphia, where I lived near 17 years.

I was educated, at home, till my 14th year (1840), in the fall of which year entered to the School of John Wythe Harris, A.M., where I remained two years, at the end of which time
It was prepared for college, but, in accordance with my Father's wish, I did not enter college till the following year. The first half of the intervening year, I passed at the School of Charles Allis, in the Study of Mathematics; after which, I again returned to the Fair Hill, where I remained till July 1848, when I entered the Freshman Hall, of the Free University of Pennsylvania, with my first and dearest friend, Henry Clifford Cave, twice dead.

In September 1849, I entered the Philomathean Society, and, about a year after, I became a member of the Aphi Society.

I spent four years, with much pleasure and profit, under the nurturing care of our "Alma Mater."

During one College Course, too, of our most beloved classmates, Henry Clifford Cave, and James Bayard Hobson, were snatched away by the cruel hand of the Stormy Mother, Death. No other heart ever beat.

I was appointed one of the speakers at the Senior Exhibition, at the close of the fall (October) term, December 1851. I selected for my subject, "A Comparison between the Beautiful and the Picturisque", but, I was excused from delivering it, as I expressed some opinions, therein, not exactly consonant with those of the Terrific John..."
Ludlow S. D. F. and as I was unwilling to act
than in conformity with his ideas.
In June 1857, having failed all
my Examinations, I obtained leave of absence,
and went to Westin to spend the Sum-
mer, having previously made an engagement
with Ackerman, Lee & Co. of Philadelphia, to
visit their store in the following August. Duri-
ging the Summer, however, I determined upon a
course of life, which I had long had a decided
predilection for, viz. that of a Professor of Mathe-
maticks; accordingly, on my return from It, I con-
decided in the Fall, I devoted myself, to the study
of that most noble Science, Mathematics, under
Ensign Nast, Esq.

In April 1858, I received the offer
of a situation, in Burlington College, N. J.,
as teacher of Mathematicks, which I accepted
the following May, and still retain.
I was confirmed by the the Bishop.
Geo. H. Doane D.D. L.T. in St. Mary's Church, Bu-
lington N.J. on the 19th Sunday after Trinity,
September 1858.

I would gladly speak in this place,
(if time and opportunity permitted), of some
of those little incidents, which make up so
large a part, of the pleasures, and of the sor-
rows, of a College life. I would a speak of the
much dreaded examinations for admission; of our first meeting in the hall, of our first dinner, of the gilt recitations to a Professor! of the first absences; of the gilt beak to be worn Saturday; of the gilt "flunk"; of the first request to "leave the room"; of the gilt speech in Chapel; of the gilt "baggage"; of the gilt "fackultying"; of the first subscription; of the first examinations; of the first awarding of honors; of lessons unprepared; of the pleasant hours in Mr. Frazard's room; of the rich lines in the Powell's room; and of Care and of Results, and of many other things, too numerous to be mentioned, much more to be spoken of; but we all remember them, and always will remember them; they are a part of our life, and to the day of our death will be looked back to with pleasure.

April 7th, 1854.

Appointed Professor of Mathematics in Burlington College Oct. 29, 1854, after the death of the former professor.

Received the degree of M. A. July 3rd 1855.

Married April 1856.

[Mr. Cox held his professorship in Burlington College until the year 1856.
He died in Philadelphia, June 18, 1878. ]
Brinton Cox.

I was born 3 August 1833 at 354 Walnut Street in Philadelphia, being the eldest child of Charles Sidney Cox, Esquire M. A. (Univ. Penn.), Counselor-at-law of Philadelphia, sometime one of the Justices of the District Court of Philadelphia, and Anna Maria, his wife, third daughter of John Hill Brinton Esquire M. A. (Univ. Penn.), Counselor-at-law of Philadelphia.

I was baptized 11 December 1833 at St. James's (P. E.) Church, Philadelphia, by the Reverend Henry J. Morton D. D. (Univ. Penn.) Rector.

I entered the School of Mr. Jaques M. A. (Univ. Penn.) in August 1842, where I remained six years until I matriculated at the Univ. Penn.

In July 1848 I matriculated as Freshman at the first (Michaelmas) term, session 1848-9, of the University of Pennsylvania.

I became a member of the Philomathean Society of the Univ. Penn., September 1849 (Michaelmas term Sophomore), and also in the Junior Year of the Delta Phi Fraternity, Alpha of Pennsylvania.

I was appointed on Speakers List at the close of the Tenth term Junior and delivered an oration on the Subject "Hastings."

I graduated at the Commencement July 1852 with the B. A. Degree and the fifth honour, when I delivered an oration on the Subject "Garrick."
Sam Cox Octavius on the B.A. roll, being the eighteenth of my family who has graduated at the Univ. Penn. 31 May 1852 I entered the office of John Cadwalader Edg. M. D. (Univ. Penn.) Counsellor-at-Law, of Philadelphia, as a student-at-law.

I entered the law school of the Univ. Penn. at the first term, session 1852-3.

Paris, August 31st, 1866.

My Dear Doctor:—I have recently returned from a trip of about three and four weeks in Germany. Our first stopping place was Cologne, where we arrived in time to be in at the death of the German Fatherland, unless, indeed, the Phoenix is destined to rise from its ashes in the shape of the Prussian Eagle. Cologne presents the same general aspect as it did when I visited it in 1857, although some important improvements have been made. In addition to the old floating bridge, which is removed every winter, a magnificent iron bridge has been constructed of a height sufficient to present no obstacle to the navigation of the Rhine. The town is, perhaps, more cleanly; certain it is that the ancient odors which inspired Golierde, seemed to be less remarkable than before. Above all, however, is the progress made in the great cathedral. The vaulting of the roof is now complete, and the interior, in fact, finished except in some minor details. It is confidently expected that the towers will be finished in fifteen years. The cathedral will then be the greatest ecclesiastical edifice north of the Alps. That the exterior shall be worthy of what the interior now is, is all that can be asked. Upon first entering the Church, unlike St. Peter’s in Rome, the effect of its interior is not gradually revealed, but bursts in full force upon the spectator. The long sweep of the nave and choir, flanked by the double aisles and opening transepts, lighted by brilliant windows of stained glass, and the lofty space included between the pavement and the vaulted roof above, form together an harmonious whole, which on entering you take in at once. The effect, like that often produced by music, is not only moral, but almost physical. The grand lines of the architecture soar aloft with so elevating power, that as the vision follows them, the breast dilates, and one feels as if his feet were about to be raised from the earth.

We ascended and descended the Rhine, stopping at several places upon its banks. We arrived at Bonn a short time before the University semester had closed. We were thus enabled to hear some few lectures, although many of the professors, including some I was most desirous of hearing, had finished their courses. I had, however, the pleasure of being present at three lectures, one by Dr. Lange, another by Dr. Schlotmann, and a third by Dr. Sell. Dr. Lange’s course was upon the Epistle to the Galatians, and his lecture was upon a portion of its last chapter. Dr. Lange’s appearance is venerable, and his manner very kind and winning. Dr. Schlotmann is younger. His course was upon the philosophy of religion, and his lecture, which was most interesting, discussed the different classes of proofs of the existence of God. Dr. Sell’s course was upon the Real Rights of the Roman law, his lecture discussing superficies. He was the only member of the faculty of law, which I had the pleasure of hearing, Dr. Walter and Dr. Bucking having finished their courses. I was also present at the distribution of prizes for essays. The solemnity took place in the aula of the university. The ceremonies began by the entrance of a procession of academic dignitaries. It was headed by the Rector and Curator. Then followed professors of the five faculties, those of Catholic theology being distinguished by the ecclesiastical habit. All the others wore gowns. The Rector wore a gown of red velvet embroidered with gold leaves. The Curator wore uniform, but no gown. The Curator is a representative of the State near the University, and not a member of that corporation. After the music had ceased the magister eloquentiae delivered a Latin oration, in the conclusion of which he alluded to his Prussian majesty as rex noster victoriosissimus. The prizes were then declared, and the envelopes containing the names of the prize men, opened. The name of each was in turn saluted by a flourish of trumpets from the orchestra. Before the orator’s desk was placed the bust of the founder of the University, King Frederick William III., from whom it takes its official name, being styled the Rhenish Frederick William University at Bonn. A large portion of the congregation consisted of students, among whom those of Catholic theology seemed remarkable on account of their peculiar dress. The Bonn University, like those at Breslau, Vienna and Tübingen, has two faculties of theology, one Evangelical and the other Catholic. The Catholic students at Bonn wear the ecclesiastical habit, and live together at the Convictu- rium.

While we were on the lower Rhine, the armistice between Prussia and the South German States was effected. The navigation of the river was thus reopened, and we were enabled to ascend it to Mayence, the usual terminus of the tourist’s voyage. Between Bingen and Mayence we passed the hostile lines, north of which the only soldiers we had seen, were of course Prussians with needle guns. At Mayence, the garrison, on the other hand, consisted of Hessians, Württembergers, and Bavarians. Mayence is one of the most important of the German Federal fortresses. It was heavily garrisoned, and the town was in a state of siege.

We arrived at Berlin just in time to miss hearing any of the lectures at the University. To our great regret we found that all the courses of the semester had been finished. We were, however, present at an interesting academic ceremony, that of the public debate upon the inaugural dissertation of a candidate for the doctorate of law, followed by his promotion to that degree. The Dean of the faculty of law presided. Three students, whose names had been previously approved of by that faculty, then successively attacked the candidate’s dissertation, which had been printed beforehand. The candidate having successfully encountered his courteous adversaries, the Dean asked for some explanations, which were given to his satisfaction. The floor was then, theoretically, open to any one present to make objections. No one, however, did so. The ceremony was, in fact, a genteel comedy arranged beforehand, very different from the same medieval proceeding of the same name. It should, however, be remarked, that the inaugural dissertations are often of great merit. After the candidate has thus successfully stood his test, he was promoted a doctor in the Civil and in the Canon law, the Dean administering the oath. Immediately upon the conclusion of the ceremony the Dean congratulated the young doctor with very much the same air as the clergymen congratulate a young couple at an American wedding. The fees for passing to the degree of doctor in the different faculties range from fifty to one hundred and fifty thalers in the German Universities. While we were in Berlin, the programme of the courses of the next semester was published, a copy of which I send you by this mail.

The Prussian Diet being in session, I paid a visit to the lower chamber, or House of Deputies. The arrangements for the accommodation of spectators are better than those of the French Legislative Body, or the English House of Commons. The public have not, however, the same ease of access which is afforded by Congress or the State Legislatures. At Berlin it is necessary to apply for tickets on the afternoon of the day before. While such restrictions are troublesome to the public, on the other hand a beneficial effect is produced in the preventing any expressions of approbation or disapprobation by the galleries.

The hall of the House of Deputies is a large rectangular chamber with galleries on three sides. The President’s desk is in the centre of one of the longer sides of the rectangle. Opposite to him on the other side of the chamber are the ministers’ seats, which are the only ones on the floor which are provided with desks. On the right of the President are the Conservative party, or members of the Right. On his left the Progress party or members of the Left. The Right and the Left fractions of the House thus face each other. Between them sit the Centre or moderate fraction, or rather factions, for they are divided into Right Centre and Left Centre. Everything about the chamber seemed to mean business. The hall was as plainly furnished as any I have ever seen, and the members themselves were dressed with great plainness. In fact, it would be difficult to find a body of men whose dress presents so little variety, and shows such little traces of expense. During my visit, the
House was occupied in discussing some irregularities in the election of two of the Berlin members. In a short space of time, brief speeches were made by many members, the subject being one not requiring any elaborate remarks. Most of the members who spoke showed great ease in debate. The President quite frequently called the House to order by ringing a bell with a handle shaped like the letter T. Among those who spoke were Dr. Virchow and Mr. Schulte-Delittech. The newly elected President is Mr. Von Forekenbeek, who owes his election to a combination between the Left and the Left Centre. He is said to be a very able man. His election is considered to be very distasteful to the Court and to Count Bismarck. While the Liberals have thus taken decided ground on this point, they have united with the Conservatives in voting an address to the King, in answer to his speech. Besides the parties above alluded to, there are two others, the Catholic fraction numbering 16 members, and the Polish fraction of 21 members. The Conservatives number 148, the Progressives 82, the Left Centre 65, and the Old Liberals 16 members.

On Sunday we went to the Court Church. For a Protestant Church it is a very large edifice. The plan is that of a long rectangle, with galleries on all the sides. The architecture is classic. The chancel is at one end, but the pulpit is in the middle of the gallery of one of the longer sides. The choir was in the gallery behind the chancel and altar, and consisted entirely of male voices. After the sermon when the communion service began, the adult voices of the choir were dismissed. The music was remarkably fine, and the greater part of the service was choral. The chancel was divided by steps into two portions. Upon these steps stood a lectern between two candelabra with unlighted candles, from which the officiating minister read the scriptures. The altar was at the farthest end of the chancel. Upon it were the sacramental vessels covered with a linen cloth, a crucifix, two burning candles, a Bible and another book. Resting on the floor on each side were two large candelabra, some eight feet high with unlighted candles about four feet in length. In the farther corners of the chancel, upon pedestals were two angels in bronze, one praying erect, and the other in an attitude of benediction. Behind the altar was an altar piece painted in oil, besides two smaller sacred portraits in mosaic.

We had excellent seats in the pew of the Diplomatic Body in the left gallery. Opposite to us was the Royal pew. In it were the King, the Queen, the grand Duke of Mecklenburg, Prince Adalbert and their attendants. The gen-

tlemen all wore uniforms, and the ladies black dresses, the Court being in mourning for the King's kinsman Prince Anthony Hohenzollern, who had recently died of his wounds. When the collection was taken up, the purse was first handed to the King.

Richard Ludlow, Esq.

ACTION RELATIVE TO HIS DEATH—MEETING OF THE PHILADELPHIA BAR.

A meeting of the Philadelphia bar was held at noon yesterday to take action relative to the death of Richard Ludlow, Esq., Hon. Joseph Allison presided, and Messrs. Thomas B. Meck and Robert P. Deshbert acted as secretaries. Mr. Allison then took the chair.

The purpose for which we have met at this hour is too well known to need any statement, and we are assembled upon this occasion, and in which he practiced his profession for so many years, with a view to meet, as far as possible, the wishes and requests of the members of the bar, and to conclude his will, with the result of the investigation that was made by us, to meet the wishes and requests of the members of the bar, and to conclude his will, with the result of the investigation that was made by us.

To look a few years hence the bar was summoned to the bar for the last time this year, and in the past few years stood prominent among the objects and most respected of our number. It is not long since we were called to do, and it was upon the occasion of this meeting, whether by the bar or by the friends of Mr. Ludlow, that we were assembled last year, that he was summoned to the bar, and in the past few years stood prominent among the objects and most respected of our number. His father, Dr. John Ludlow, served as provost for a number of years. He afterwards devoted himself to the study of law, and was quite successful in that profession. He was engaged in politics, and was elected to the Legislature. For some time his health was not at all, and he was in difficult health. During all these years he was a leader of the bar, and was universally respected by his large circle of friends and professional brethren.

The court then adjourned until tomorrow, as an account of the death of Richard Ludlow.

Richard Ludlow, a member of the class of 1874, was a leader of the bar, and was universally respected by his large circle of friends and professional brethren.

The above was received with appropriate remarks, by William Badger, John P. Montgomery, Benjamin H. Brown, Judge Deneen, Thomas J. Ashton and H. G. Jones.

The Court then adjourned.

Received the degree of A.M. July 5th 1856.
Dr. Mitchell was born in Philadelphia, Aug. 16, 1828, the only son of Archibald Mitchell & Jane Ellen Matthews. Before entering the College Class, Univ. of Penna, he had graduated from the Central High School of Philadelphia, July 19, 1849, with the degree of A.B. He abandoned the practice of medicine at the breaking out of the war to enter the service of the United States as a volunteer surgeon. He was Major 1st of the 18th Penna. Inf., U.S.V., April 21, 1861 until August 7, 1861, when he was mustered out. He reenlisted in 8th Penna. Cavalry, U.S.V., with the rank of Major Surgeon, August 17, 1861, and while mustered out by reason of expiration of service, January 24, 1865. He was reenlisted as Colonel, U.S.V., March 13, 1865, in "pulvis et membrorum series." He received from Surgeon General Barnes, U.S.A., the position of the Medical Staff of the U. S. Army, the only volunteer surgeon thus honored.

On April 15, 1865, Dr. Mitchell organized the Military Order of the Loyal Legion of the United States; and his name appears first in its roll of membership. He drafted its constitution, designed its seal and badge, and was elected President of the Commandery of the State of Pennsylvania in that year; and was continued in this office by successive elections until the year of his death.

He was an enthusiastic member of the Masonic fraternity. As president of the Board of School Directors of the North Ward of Philadelphia, he served several years. He was a founder of the Phi Kappa Sigma fraternity – Alpha Chapter, Univ. Penna. – Dr. Mitchell died at Spring Hill, Delaware Co., Penna., August 16, 1879.

In December, 1887, through the efforts of Eliot L. Proctor, Class of '89, College, Alpha Chapter of the Phi Kappa Sigma fraternity presents to the Trustees of the University of...
Pennsylvania the sum of five hundred dollars, to found a prize to be known as the "Prize established by the Phi Kappa Sigma Fraternity in honor of its founder, Samuel Brown Wylie Mitchell," the interest of the fund to be given annually to the student of the Sophomore Class of the College who attains the highest average in English Composition. This was the first prize ever founded at the University by a fraternity.
Dracass, Jr.

I am descended from an old family of friends, and was born
the 12th day of fifth month, 1787, at No. 183 Chestnut Street, directly
opposite the room in which the Declaration of Independence
was signed, of Isaac Ross, Esquire, M.A. (University of Bonna)
fourth son of Joseph Parker Ross, for many years resident
where the Bostom House now stands and where parties with
the Government for the United States Bank, living in
Chestnut above 10th street; and of Mary Pepper, eldest daughter
of George Pepper Esq. living at No. 225 Chestnut Street.
