Honored Provost of the University, to whom The Elliott Cresson gold medal was recently awarded by the Franklin Institute of Philadelphia. This distinguished award was made “in recognition of his leading work in the field of electro-chemistry, of his many contributions to the literature of chemical science and of his great service in University education.”
TWENTY-FIFTH ANNIVERSARY
(OUR FOURTH REUNION)
CLASS OF '89, MEDICAL
OF THE
UNIVERSITY OF PENNSYLVANIA
DINNER
AT THE
UNIVERSITY CLUB, PHILADELPHIA
FRIDAY, JUNE 19, 1914
OUTING
Saturday, June 20, 1914
REUNION COMMITTEE
WILLIAM CAMPBELL POSEY,
CHAIRMAN AND CLASS PRESIDENT
J. HOWE ADAMS
MORRIS BOOTH MILLER
ALFRED STENGEL
JOSEPH P. TUNIS
T. MELLOR TYSON
H. B. CARPENTER
SECRETARY AND TREASURER
PUBLISHED BY
THE JOHN C. WINSTON COMPANY
PHILADELPHIA
Foreword

In the second year of our Medical School days our Class numbered one hundred and thirty-eight students. Ninety-one of them are shown in the reproduction of a photograph taken in front of Logan Hall, April 17, 1887. One hundred and twenty-four of this number received their diplomas on May 1st, 1889. A month later, four additional names were added to this list, the delay in graduation being due to ill-health for the most part.

In the twenty-five years which have elapsed since our graduation, twenty-six men have died. Of the latter, six succumbed during the last five years. During this longer period, also, there are about twenty who at one time or another persistently refuse to answer all communications sent to them. As a result of these and other causes, only about sixty took the trouble to answer the letters and circulars of your committee.

During the quarter of a century above mentioned, we have had three records printed. One on our Tenth Anniversary, of 38 pages; one on our Fifteenth, of 56 pages, and one on our Twentieth, of 28 pages. This record, therefore, will be our fourth. Of these, the first and second were freely illustrated.
April 17, 1887

Class of '89 Medical in front of "Logan Hall," April 17, 1887.
COMPLETE LIST OF THE CLASS AT GRADUATION.

*Deceased.

Adams, J. Howe
Alrich, Wm. M.
Anderson, Willis S.
Applebach, Harry E.
Bacon, John
Baker, Nathan M.
Banks, Wm. H.
Bashore, Harvey B.
Benedict, Arthur L.
Birney, Herman H.
Boger, John A.
Bolling, Robert H.
*Brooke, Benjamin
Brown, James G.

McConnell, J. W.
O'Hara, Michael
Wilson, Richard
REPORT OF TWENTIETH ANNIVERSARY.

The twentieth reunion of the class was held at the Racquet Club, Philadelphia, on Friday, June 11, 1909, at 7.30 P. M. Out of the forty men expected, thirty-seven attended the banquet.

Dr. J. A. Scott, who had as usual worked hard and faithfully to make the reunion a success, was kept away by a protracted illness which a few weeks later proved fatal. John A. Boger was convalescing from a severe illness, and C. D. Schaeffer, also for much the same reason, was unable to be present. A number of absent classmates sent telegrams and letters.

Charlie Davis, our ideal toastmaster, presided over the dinner as only he can do, and kept things constantly moving.

The following morning, i.e., Saturday, a few hardy survivors took in the clinics given by some of our classmates.

After a luncheon twenty-two met at Broad Street Station to board the train for Devon, Pa., where large four-horse ’busses were waiting to convey the men to “Valley Forge.”

Several hours passed pleasantly in exploring this historic battlefield and in signing the visitors’ book at the museum. Then a chicken and waffle supper was served on the porch of the “Washington Inn.” On this occasion it is interesting to record that only one man took a strong drink. The return ride proved most enjoyable, replete with song and chorus. A unanimous vote of
thanks was tendered the committee, the banquet and outing being pronounced by all a most unqualified success.

The latter party was made up as follows:

On Sunday, June 13th, about twenty of the above were entertained by Henry Delano Wilson, U. S. N., on board the United States war vessels stationed at League Island.
INDIVIDUAL RECORDS.

ADAMS, J. HOWE, "Dingley Dell," Howellville Road, Paoli, Pa., gives his time up to the maintenance of a hospital, where he looks after private operative cases, nervous cases or those who do not care to become patients in the large institutions. This hospital is located at Paoli, Pa. Specializing along neurological lines. He has a son who is a student in the medical department of the University of Pennsylvania. His favorite hobby is motoring.

ALRICH, WILLIAM M., Carpenter Lane, Germantown, Pa., continues to practice general medicine. He is still unmarried and has changed very considerably in physique since graduation, and is not now nearly so heavy as at that time.

ANDERSON, W. S., Shelley, Ohio, continues in general practice, and considers that it is worth while to mention that in doing such work he is "still living." Hobbies, motoring and farming.

APPLEBACH, HARRY E., 1016 West Lehigh Avenue, Philadelphia, continues in general practice. He is now associate surgeon of the Kensington Hospital. On account of ill health he has temporarily given up his practice, and regrets that he cannot attend our reunion.

BACON, JOHN, continues in general practice in Torresdale, Pennsylvania, where he covers a large territory. He continues to use horses in his work. Favorite hobby, "flowers."

BAKER, NATHAN M., Spokane, Washington, continues to do everything in the range of general practice, excluding major surgery only. For the past ten years has been a member of the Board of Health of his city. He is a member of the staff of the Deaconess Hospital. His hobby is growing flowers. "I should truly enjoy being with you, but fear that the great distance intervening and the habit of everlastingly sticking to my work will prevent my coming."

BANKS, H. V., Mifflintown, Juniata County, Pennsylvania, continues in general practice. He is a surgeon of the Pennsylvania Railroad, and uses a horse for his work. In the A. M. A. Directory he is rated as a Tuberculotherapist.
BASHORE, HARVEY B., West Fairview, Pa., continues in general practice. Does a good deal of surgery. He is medical inspector of the State Department of Health. Has written an article on the sanitation of recreation camps and parks. Still remains single.

BENEDICT, A. L., 228 Summer Street, Buffalo, New York, born at Buffalo, N. Y.; son of Nathan Gregory, Jr., and Gracia Skinner (Smith) B.; student University of Rochester, two years; A.B., University of Michigan, 1887; M.D., University of Buffalo, 1888; M.D., University of Pennsylvania, 1889; (honorary A.M., Ohio Wesleyan, 1891); consultant in digestive diseases, City and Columbus Hospitals; attending physician to the Mercy Hospital, Buffalo; prize essayist in medicine, A. M. A., 1900, and twice prize essayist New York State Medical Society; superintendent ethnology, Buffalo Exposition, 1900-01; member American Academy of Medicine (ex-vice-president), American Gastroenterologic Association (councillor), A. M. A., Medical Society of the State of New York, Buffalo Academy of Medicine, Delta Upsilon (president Michigan Chapter) Club; University. Author: “Practical Dietetics,” 1904; “Golden Rules of Dietetics,” 1908. Editor Buffalo Medical Journal. (From “Who's Who in America.”) He has married since our last reunion. His favorite hobby is Indian relics.

BIRNEY, HERMAN H., 4016 Chestnut Street, Philadelphia, has a prosperous general practice in West Philadelphia. Records no special changes in the past ten years. He uses a “Ford” runabout, which he has found satisfactory.

BOGER, JOHN ALBERT, 2213 North Broad Street, continues to practice general medicine and surgery. In 1907, was elected a visiting surgeon to Stetson Hospital. He does a good deal of expert court testimony. Still remains single, uses a “Packard” car.

BOLLING, ROBERT H., of Chestnut Hill, continues in general practice there. He uses a “Winton,” No. 14, in his work.

BROWN, JAMES G., Woodville, Pa., continues in general practice. He has five children which are his hobbies. He is secretary of the County Board of Health. Still uses a horse and buggy.

BRYAN, JOSEPH ROBERTS, 4200 Chestnut Street, Philadelphia, continues in general practice, and has paid some special attention to diseases of children, having nine of his own. He is visiting physician to St. Vincent’s Hospital. His hobby is antiques, human and otherwise. He uses an “Autocar” runabout.
BURD, WILLIAM J., Belvidere, New Jersey, continues his general work and uses an “Autocar.” In June, 1912, he received the honorary degree of Master of Science from Lafayette College. He is secretary of the Warren County, N. J., Medical Society; treasurer of the Belvidere Delaware Bridge Co., and director of the Belvidere National Bank. His hobby is automobiling.

BURGER, FRANCIS J., 41 Buffalo Avenue, Borough of Brooklyn, N. Y., continues in general practice in Brooklyn. Since 1897 he has had charge of the Hebrew Orphan Asylum, in connection with which institution taking care of over 700 children between 2 and 14 years old. There is also a hospital of which he is the chief. This has been a continuous service with the exception of the first nine months of 1900. He has used both the horse and the automobile in his practice, but prefers the horse. His hobbies are all kinds of out-of-door sports. He fears he would not recognize any of his classmates whom he has not seen for twenty-five years.

CANBY, EDMUND, 10 Rue du Petit Saleve, Geneva, Switzerland. He paid a brief visit to the United States last fall. He continues to practice ophthalmology. His hobbies are photography and motoring. He sends his “remembrances to the committee and others who may remember him,” under date of April 17th, from Rome, Italy.

CARPENTER, HERBERT B., 1805 Spruce Street, Philadelphia, is still single. He rejoices in a large general practice, and is an enthusiastic believer in an “Appersan,” which he has used for many years. He is one of the active spirits in the Philadelphia Alumni Society of the Medical Department of the University of Pennsylvania. On the twenty-first birthday of this organization he was elected president. His hobbies are the theatre and yachting. He has given up his hospital appointments.

CARPENTER, JOHN T., 2040 Chestnut Street, Philadelphia, continues to enjoy a good practice in his specialty, ophthalmology. He is lecturer on ophthalmology at the University of Pennsylvania and ophthalmic surgeon to Bryn Mawr Hospital. He has also joined the United States Army Medical Reserve Corps. His suggestion as to how we can most enjoyably spend Friday and Saturday together, is: “Get next to nature.” His hobby is horseback riding.

CLARK, J. FREDERICK, Fairfield, Iowa, continues in general practice. He was elected a member of the Iowa Legislature in 1907. He was the first vice-president of the Iowa Medical
Society, and was president of the S. E. Iowa Medical Society. His hobby is the study of toadstools.

CLEVELAND, ARTHUR H., 256 South 15th Street, Philadelphia, continues to practice his specialty of the diseases of the nose, throat and ear. He is laryngologist to the Presbyterian Hospital and to the Pennsylvania Institute for the Deaf and Dumb.

CROTHERS, S. ROSS, Chester, Pa., where he engages in general practice. He is surgeon to the Chester Hospital, and has served as Mayor of Chester. Is also surgeon to the Pennsylvania Military College on the Pennsylvania Railroad.

CURRY, EDWIN ADAMS, Danville, Pa., continues to engage in general practice. In the early part of April, Curry wrote that he had every intention of attending our reunion, but that he was still suffering from the effects of a left-sided hemiplegia, due to a cerebral thrombosis on January 25th. Fortunately he is steadily improving, and we hope to have him with us.

DAVIS, CHARLES N., 1931 Spruce Street, Philadelphia, still confines his work exclusively to diseases of the skin. He is dermatologist to the Pennsylvania Hospital, and has the unique distinction of being our first grandfather. His favorite hobbies are golf and riding.

DAVIS, WILLIAM J., 372 High Street, Pottstown, Pa., continues in general practice, and he finds a horse most valuable for his work.

DEEKENS, ARTHUR HAMILTON, Madison Heights, Va. For over eighteen months Deekens has been building up a rural practice and improving a somewhat run-down farm about nine miles from Lynchburg, Va. His address is: "Cloverdale Farm," Madison Heights (R. F. D., No. 1), Va.

DIMM, CHARLES H., Mifflinburg, Pa., continues in general practice. No special changes have occurred in his work or family during the past five years. He uses horses for his work.

FERGUSON, ALBERT D., 50 East Johnson Street, Germantown, Philadelphia, continues in general practice. Was appointed, some time ago, physician in charge of the Widener Memorial Industrial Training School for Crippled Children, one of the most beautiful buildings of this sort extant. His hobbies are a motor car and photography.
GALLAHER, THOMAS J., Denver, Colorado, continues to practice his specialty, the nose, throat and ear, in Denver. He has received the degree of A.M. from Washington and Jefferson College, and is laryngologist to St. Luke's Hospital.

GALLAGHER, GEORGE W., Connellsville, Pennsylvania, continues in general practice. He is staff surgeon to the Cottage State Hospital and surgeon to the P. and L. E. R. R. and W. Md. R. R. His hobbies are hunting, fishing, quoits, etc. His suggestion as to how we can most enjoy our Friday and Saturday together is: “Have some other class try to tramp upon us.”

HARRIS, THOMAS J., 104 East 40th Street, New York City, continues to specialize in the nose, throat and ear. He has for several years made a most energetic and efficient secretary of the American Laryngological, Rhinological and Otological Society, of whom the class may well be proud. He is adjunct professor of laryngology in the New York Postgraduate School and junior surgeon to the Manhattan Eye, Ear and Throat Hospital. He has written nineteen articles or pamphlets on subjects connected with his specialty. He is still unmarried. His hobbies are tennis, canoeing and mountain climbing. While showing no signs of change in manner his proportions are becoming somewhat aldermanic.

HEIL, U. S. GRANT, 1330 Washington Street, Easton, Pa., has removed from West Philadelphia, where he was formerly in general practice, and continues his work (not actively) in Easton, Pa., where he is president of the Board of Health.

HORNING, FRANK L., 623 Market Street, Camden, N. J., was heard from five years ago, but this year has not answered our blank.

HULL, WALDO W., Williamsport, Pa., continues in general practice, and has been appointed visiting physician to the Williamsport Hospital, and retired as major and surgeon of the 12th Regiment, N. G. P. In 1906, he was president of his County Society. In the A. M. A. directory he is described as a “urologist.”

HUMPHREY, GLENNIS EUGENE, continues to practice internal medicine in Cambridge Springs, Pa. He is a school director and member of the Board of Health from his district. While he thoroughly enjoyed our last reunion he fears that he will be unable to attend this one.
HUNSBERGER, J. NEWTON, 514 Main Street, Norristown, Pa., continues in general practice. He practiced for twenty-two years in Skippack, Pa. Has written several pamphlets. His hobbies are horses.

JOHNSTON, WILLIAM G., Titusville, Pa., continues in general practice, with a preference for surgery. His hobby is hunting.

JONES, CHARLES J., 1507 Locust Street, Philadelphia, continues to do good work in his specialty, ophthalmology, as he has done for the past twenty years. He is ophthalmologist to the St. Joseph and St. Vincent’s Hospitals. He is president of the Home and School Association of the School of Pedagogy of Philadelphia. He mentions several gifts received from grateful patients after successful eye operations; one of $50,000.00 in 1910, one of $15,000.00 in 1911, and one of $5,000.00 in 1912. His hobbies are boxing in winter and ocean sailing during the summer. He is the proud father of five children.

KEEFER, FRANK R., West Point, N. Y. In writing of Keefer, a classmate says: "Frank is one of the boys who has made good in every sense of the word. He is entirely unchanged after twenty-five years, clean, sweet, manly, a gentleman in every way, universally liked. His ability is of a high order, and this, with his engaging personality, has made him go ahead fast in the ‘Service,’ now holding the rank of Lieutenant Colonel. He covered himself with great credit in the Philippines, and afterwards in his work at the military post near Washington. I have seen considerable of him in the last few years, but not nearly as much as I should like to. During most of this period he has been stationed at West Point as the post surgeon, occupying at the same time the chair of professor of hygiene. This position is one of the most responsible in the army. Upon him as post surgeon devolves the health of the entire garrison, as well as the instruction in hygiene of the cadets. Frank has a charming wife, a Southern girl, but no children. He looks scarcely a day older than when he graduated." He married Mary Cornelia Terrell about ten years ago. In addition to numerous official reports, Keefer has written the following pamphlets: "Prevention of Typhoid Fever," 1911; "The Functions of the Medical Department, U. S. Army," 1912; lectures, "Personal Hygiene," "The Chief Preventable Diseases of Soldiers," "The Conservation of Health in Hot Climates," "Camp Sanitation," and textbooks, "The Nature and Effects of Alcohol and Other Narcotics," 1912; "Military Hygiene" (in preparation).
KEISER, ELMER C., East corner Tulip and Disston Streets, Tacony, Philadelphia. He conducts a successful practice in the neighborhood of Tacony and Frankford. He was chairman in 1909 of the Northeast Branch of the County Medical Society. Is physician to the Convict Department, Philadelphia County Prison, and to the Frankford Hospital.

KETCHAM, S. RUSH, 1636 Green Street, continues in general practice in Philadelphia. He helps to teach bacteriology under Joe McFarland. On March 4th he wrote that he could not attend our reunion because he was paying a visit to Redlands, Cal.

KNEASS, SAMUEL S., “The Warwick,” 1906 Sansom Street, continues to practice among the bacteria. Sam is doing all sorts of stunts with his new automobile.

LAMOTTE, HENRY, Seattle, Washington. A classmate, in whom a deep-seated love of Alma Mater still flourishes, writes: “Of LaMotte, the story is quite different. Probably no man in the class has had a more varied and interesting career. With his early medical life in the United States Navy, and afterwards as Major of the Rough Riders, you are acquainted. After retiring from the ‘Service,’ when he had recovered his health, Harry specialized in diseases of the eye. He settled first in Massachusetts, but later moved to Salt Lake City. With his old-time pugnacity, he soon got into trouble with the Mormon fathers, and feeling that the task of wiping them out of existence was too much for one man, he removed for the sake of his health, to Seattle, Washington. Here, until recently, he has been in practice. The last year, however, he has been seriously incapacitated as the result of a bad knee. This has compelled him temporarily to give up the practice of medicine, and he is now coming by slow stages, by way of the Panama Canal, to the East, accompanied by his wife. They have one child, Bob, a cadet at Annapolis.”

On April 3d we had a belated letter from Harry in which he said: “I have been in Central America since November, and I am sorry to say it will be necessary for me to immediately return to Seattle, and I will not be able, on that account, to be present at the reunion.”

LEDERMAN, MOSES DAVID, 58 East 75th Street, New York City, continues to practice his specialty, nose, throat and ear, in New York. He is attending aurist and laryngologist to the Lebanon Hospital, New York, and continues to hold his pre-
vious positions. He has three children. He is consultant aurist and laryngologist to the United Hebrew Charities of New York, and associate editor of the *Laryngoscope*. Among the many special articles he has written may be mentioned: 1. A case of mastoiditis with affected sinus trombosis in a young pregnant woman, operation, abortion, pulmonary abscess, cerebral hernia, other complications and final recovery. 2. Septic infections of the mouth and throat. 3. Acute inflammations of the middle ear and their treatment. 4. Acute Phlegmonous epiglottitis, etc. He has introduced a new creasol preparation to the profession which is non-eschorotic as a local application to nose, throat and ear diseases. His hobbies are tennis, travelogues and the theatre. He suggests that “we get together at some pleasantly comfortable spot, forget our routine work and return to college days.” A classmate who follows the same specialty writes: “Mose Lederman is another one of the class that has made good. Lederman has for many years specialized in diseases of the nose, throat and ear. He was for a long time connected with the Manhattan Eye, Ear and Throat Hospital, and is now a professor in the New York Polyclinic Hospital. He is a good observer and an excellent operator. He married a rich wife and has a quiver full of children; genial, warm-hearted, he has a host of friends, and to me, at least, he does not seem to have changed in a quarter of a century.”

**McCONNELL, J. W.,** 701 North 40th Street, continues in general practice in West Philadelphia, but devotes a great deal of attention to neurology. He is assistant neurologist in the Philadelphia General Hospital and associate in neurology at the University of Pennsylvania, and assistant neurologist to the University Hospital.

teriologists, American Society of Tropical Medicine. Author: Pathogenic Bacteria, 6 editions, 1896-1900; Text-book of Pathology, 1904, '09; Biology, General and Medical, 1910; also many contributions to medical literature in German and English." He is also pathologist to the Philadelphia General Hospital. His hobbies are entomology, particularly the study of bees and wasps, and story writing.

McNAUGHER, SAMUEL, 2341 Penysville Avenue, N. S., Pittsburgh, Pa., still continues in general practice. He is physician to the Allegheny General Hospital. No special changes have occurred in his domestic or professional life. "Nothing but the same old routine practice with its pleasures as well as its aches."

MILLER, MORRIS BOOTH, 2117 Pine Street, Philadelphia. He is professor of surgery at the Philadelphia Polyclinic, and continues to hold his other surgical positions. Has written a number of articles on surgical subjects. He was appointed by President Taft to the Medical Reserve Corps of the U. S. Navy, his commission dating from January 14, 1913. He is third on the list. Still goes trout fishing every year.

MOORE, CYRUS CHESTER, 2118 North Hancock Street, Philadelphia, continues to specialize in diseases of the eye. He is an assistant in the Eye Department of Stetson Hospital.

NEUBER, GEORGE G. E., 2808 Girard Avenue, Philadelphia, continues in general practice. He has two children. Uses a "Reo" touring car. His hobbies are automobiling and machinery.

O'HARA, MICHAEL, 2018 Pine Street. O'Hara continues in general practice, but has had a great deal of experience in anaesthesia and surgical work. He continues to hold the position of assistant medical inspector to the Bureau of Health.

PHILLIPS, HORACE, 4713 Baltimore Avenue, Philadelphia. He resigned from the Pennsylvania Hospital for the Insane last December. He is now alienist to the Eastern State Penitentiary and to the District Attorney's office in Philadelphia.

POSEY, WILLIAM CAMPBELL, 2049 Chestnut Street, is still one of the leading oculists of the city. His well-appointed offices help to work off daily crowds of patients. For further details see "Who's Who in America." On December 14, 1911,
he married Hadassah H. Felton, in Chicago. Their marriage has since been blessed with a girl and a boy, the latter having been born February 6, 1914. In the past five years he has suggested to the U. S. Government certain visual standards for pilots which are of great practical value. His hobbies are walking and horseback.

PRICE, WM. HENRY, Swarthmore, Pa., continues in general practice. He is consulting physician to St. Vincent’s Orphanage, and to the Orphan Society of Philadelphia. His step-daughter married, and now has a boy eight years old. Has been happily married seventeen years. He leaves for his summer practice at Point Pleasant, N. J., on June 1st, so regrets that he cannot join us. His hobbies are motoring and sailing.

RAWLINS, BENJAMIN R., 841 First National Bank Building, Chicago, Ill. For the last twenty years has confined his work almost entirely to life insurance, representing the Equitable Life Assurance Society. He has three children, “the finest in the country.”

REISERT, WILLIAM, 1507 South Broad Street, continues to do a good general practice in Philadelphia. Can be frequently seen running up and down Broad Street in his “Franklin” runabout.

RODGERS, ROBERT, JR., 3307 North Park Avenue, Philadelphia, continues in general practice. He left Philadelphia for a time and has only returned lately to resume his practice.

ROSENAU, MILTON JOSEPH. “Sanitarian; born Phila., January 1, 1869; son of Nathan and Matilda (Blitz) R., Public and High schools, Philadelphia; M. D., Univ. of Pennsylvania, 1889; post-graduate studies in Hygienische Institut, Berlin, 1892-3; L’Institut Pasteur, Paris, 1900; Pathologisches Institut, Vienna, 1900; Married Myra B. Frank, of Allegheny, Pa., June 16, 1900. Surgeon U. S. Public Health and Marine Service, 1890-1909; director of the Hygienic Lab. same, 1899-1909; resigned; Prof. of Preventive Medicine and Hygiene, Harvard Med. School since Oct. 1, 1909. Was quarantine officer San Francisco, 1895-98; delegate of U. S. to the 10th International Congress Hygiene and Demography, and 13th International Congress Medicine and Surgery, Paris, 1900; Member of the International Commission for Revision of Nomenclature of the Causes of Deaths, Paris, 1900; sanitary expert to the 2nd Pan-American Conference, Mexico, 1901; Prof. Bacteriology, Washington
Post-Graduate Medical School; special lecturer on tropical diseases, Georgetown University. Member of the Association of American Physicians, American Medical Association, A. A. A. S., Soc. of American Bacteriologists, American Association of Pathologists and Bacteriologists, etc. Organized quarantine at Santiago and other Cuban ports, 1898-9. Author: Formalin Disinfection of Baggage without Apparatus, 1901; Viability of the Bacillus Pestis, 1901; Course in Pathology and Bacteriology, 1902; Disinfection and Disinfectants, 1902; Experimental Studies in Yellow Fever and Malaria, 1904; The Immunity Unit for Diphtheria Antitoxin, 1905; A Method of Inoculating Animals with Precise Amounts, 1905; The Cause of Sudden Death following the Injection of Horse Serum, 1906; Experimental Gastric Ulcer, 1906; The Origin and Spread of Typhoid Fever, 1907; the Standardization of Tetanus Anti-toxin, 1908; also anaphylaxis, foot and mouth disease, pasteurization, milk and its relation to the public health, viability of the tubercle bacillus, yellow fever, malaria, infantile paralysis, organic matter in the expired breath, etc., and monographs and mag. and report articles on sanitary and bacteriological subjects. Home: 65 Naples Road, Brookline, Mass.” (“Who's Who in America.”)

From the Boston Transcript of October 22, 1913, we learn that “Ether Day” was observed at the Massachusetts General Hospital with technical demonstrations, and with a notable address by Dr. Milton J. Rosenau, '89, Professor of Preventive Medicine and Hygiene in Harvard University, commemorating the sixty-seventh anniversary of the first public demonstration at the hospital of ether as a surgical anesthetic.

Dr. Rosenau’s address, with the title “Progress and Problems in Preventive Medicine,” was an inspiring summary of the great progress of recent years in our knowledge of the causes of disease.

In an address on the “Conservation of Our Natural Ice Business” he concludes with the remark, “The proper use of ice prevents sickness and saves lives. Cold ice is a warm blessing.”

He is vice-president of the Cuvier Association for the study and prevention of infant mortality. Was awarded a gold medal by American Medicine for distinguished services to humanity. He is a member of the Massachusetts State Board of Health and director of the School for Health Officers of Harvard University and the Massachusetts Institute of Technology. His favorite hobbies are tennis, walking, bridge and biographies.

SCHAEFFER, CHARLES, Allentown, Pa., is physician and surgeon-in-chief, as well as director of the Allentown Hospital, where he has ample opportunity for doing most excellent work.
He has served his city as mayor for one term, and is one of the busiest men in his part of the country.

SHISSLER, ALFRED G., Shamokin, Northumberland County, Pa., was married April 21, 1908. He continues in general practice and has been a member of his Borough Council for several years. He also runs a drug store. His hobby is the history of the town.

SILVA, MANUEL C., dA., is now living in Rio de Janeiro, Brazil, where he is librarian of the Biblioteca Nazionale. No direct news of him has been received since graduation.

SINNAMON, GEORGE, 2204 East York Street, Philadelphia, continues in general practice in the northeastern section of the city. He is police surgeon of the 26th district, physician to the Old Ladies' Home at Wissinoming, and to the Kensington Day Nursery. His hobbies are automobiling and yachting.

SMALL, J. FRANK, York, Pa., continues in the practice of general medicine and surgery. Has twice been health officer of his city and city physician. He expects to retire from active practice, if he has not already done so, on May 1, 1914. He was married on October 4, 1911. His hobbies are automobiling and "Seeing America First." He suggests that we "do not have too much conventionality at dinner." Further he writes: "Certainly pleased at reports of continued success and prominence of our classmates. '89 was some class. I want all touring classmates to stop in York and look me over."

SMITH, A. DONALDSON. After acting as United States Consul in Mersine, Turkey, left the service and returned to the United States. He has written some articles on Africa for geographical publication. Still single. As far as we can ascertain he is now living on a farm in New Jersey. His present address is unknown to us, and he steadily refuses to answer all communications.

SMITH, ROLLO LAMAR, 2987 Richmond Street, Philadelphia, continues in general practice. Promises he would not miss the reunion.

STENGEL, ALFRED, 7128 Spruce Street, Philadelphia, was married on February 4, 1909, to Miss Martha O. Pepper. He has two children—Alfred, Jr., aged four, and Martha, aged two. He has stopped general practice, and now does only office and consultation work. He is visiting physician to the University and Pennsylvania Hospitals. For further details see "Who's Who in America." Lately his hobby has been farming.
STITT, EDWARD RHODES, lives in Washington, D. C. He has specialized in tropical medicine, and is head of the Department of Tropical Medicine and Bacteriology, United States Naval Medical School, and lecturer on tropical medicine, Jefferson Medical College, Philadelphia. Has written a book entitled, "Practical Bacteriology, Blood Work and Animal Parasitology."

SWAVING, JOHN HARRY, 501 Garfield Square, Pottsville, Schuylkill County, Pa., continues to practice general medicine. He is a member of the American Medical Association. For some occult reason he persistently refuses to answer any communications from your committee.

SWIFT, ELISHA P., Norway, Michigan, continues in the active practice of general medicine and everything that it includes. He still owns and maintains the Penn-Aragon Mining Company Hospital. His hobby is automobiles.

TOULMIN, HARRY, Haverford, Pa., continues to devote his time to medical life insurance, and is the Medical Director of the Penn Mutual Life Insurance Company of Philadelphia. His first wife died in May, 1909, and in October, 1912, he married again. On February 23, 1914, a daughter was born to them. This is his third child, two girls and a boy. He has also made some notable contributions to the best medical literature of life insurance work. His hobbies are golf and fishing.

TUNIS, JOSEPH PRICE, St. Martins, Chestnut Hill, Philadelphia. Since 1906 has confined his work to ear, throat and nose. He gives an operative course at the Polyclinic on the nose and throat with especial attention to the accessory sinuses and demonstrations on the cadaver. He is a member of the American Laryn., Rhinol. and Otol. Soc., etc., and has written several pamphlets on his specialty. His hobbies are golf and photography.

TYSON, T. MELLOR, 1506 Spruce Street, Philadelphia, continues in the practice of internal medicine, associated with his father, Professor James Tyson. He has specialized on kidney diseases and tuberculosis. He is one of the physicians to the Philadelphia General Hospital and the Rush Hospital for Consumptives. His hobbies are automobiling and driving horses.

UMSTEAD, WILLIAM MAITLAND, 2812 Oxford Street, Philadelphia, continues in the general practice of medicine. Considers nothing worthy of mention has happened since the last reunion. Drives a horse.
VANBUSKIRK, FREDERICK W., Pottstown, Pa., continues in general practice. Is surgeon to Pottstown Hospital. Uses horses to get about.

VANMETER, SEYMOUR D., Denver, Colorado, confines his practice to general and abdominal surgery. He is a visiting surgeon to the City and County Hospital, Denver, and has continued his activity in the development of state and national medical laws. On the hospital staff he is second in seniority. Has written a number of papers on surgical subjects. Has had two postgraduate trips to the European surgical clinics. His hobbies are: "Team work in operating and up-stream superiority in trout fly fishing."

WILSON, E. ELLSWORTH, Glenside, Pennsylvania, continues to do general practice. He has three children—Esther E., aged 14; J. Clayton, aged 9; and Ruth H., aged 6. In addition to his office practice he is interested in the manufacture of photographic specialties and water colors.

WILSON, HENRY DELANO, Surgeon U. S. N. A number of the class will remember the hospitality extended to them by Dr. Wilson at League Island on Sunday, June 13, 1909.

After being detached from the U. S. S. Kearsage he was ordered to Boston, Mass., where he was Recruiting Officer for several years. We regret to learn that he is now a patient in the Naval Hospital, Boston.

WILSON, SAMUEL M., 1517 Arch Street, Philadelphia, still remains single, and continues in general work. He uses a horse or a "Stanley Steamer" to get about.

WILSON, RICHARD. Present P. O. address, Apartado 629, Havana, Cuba. Unmarried and a Catholic. Born in Santiago de Cuba, W. I., August 2, 1866. Received preliminary education, first in Paris, France, where he spent three years in school (1875-1878); second, at Dr. John W. Faires' Classical Institute, Philadelphia, where he spent five years (1878-1883). Entered the University of Pennsylvania in 1883, Department of Arts. During the junior year elected the course in philosophy. Left at the end of this year and entered the medical department. He received the degree of M.D. in 1890, having taken the fourth year. While at the University was a member of the Philomathean Society (treasurer for one term); member of the College Boat Club; member of the D. Hayes Agnew Surgical Society (and treasurer of it while in the third year class); medical editor of the Pennsylvanian.
Resident physician at the University Hospital from March to December, 1891, and at the Pennsylvania Hospital from February, 1892, to October, 1893. From 1894 to 1898 was in private practice in Philadelphia, and had various dispensary appointments, among them the Polyclinic, St. Agnes' and University Hospital Dispensaries. When a student and shortly after graduating he reported several interesting cases that were published in the University Medical Magazine and the Medical News.

During the Spanish-American war he served in the U. S. Army, having been appointed acting assistant surgeon on July 9, 1898. He resigned January 6, 1901.

During this time he served as follows: Was ordered first to Tampa, where he was attached to the 11th U. S. Infantry; went with it to Puerto Rico, where the regiment formed part of Gen. Schwann's Brigade. It landed at Guanica and marched to Mayaguez. Before reaching Mayaguez there was an engagement at Hormiguero (August 10, 1898). At Mayaguez he was detached from the regiment and ordered to Ponce (October 10, 1898), where he was put in charge of the Officer's Hospital, until it was closed on November 30, 1898.

Then appointed attending surgeon at district headquarters at Ponce, P. R.

In February, 1899, he was ordered to the Vaccine Station at Coamo Baths, P. R., where 1,125,000 vaccine points were made to vaccinate the whole island. Here he was assigned to duty as executive officer at the distributing station. There were seven doctors and about fifty hospital corps men engaged in this work.

At the completion of this work he was ordered to Santiago de Cuba, arriving there during an epidemic of yellow fever. On July 26, 1899, he was assigned to duty as attending surgeon at department headquarters, which position he retained until he resigned from the Army on January 6, 1901.

On April 12, 1901, he was appointed acting assistant surgeon in the U. S. Marine Hospital Service, at Santiago de Cuba.

He remained in this position until the government was transferred to the Cubans, on May 20, 1902, when he was transferred with it as Port Physician and Director of the Fourth Maritime District (this included Guantanamo, Daiguiri and Manzanillo).

On June 30, 1902, he resigned, so as not to give up his United States citizenship.

On July 16, 1902, he was appointed Acting Assistant Surgeon in the United States Public Health and Marine Hospital Service and attached to the American Consulate at Santiago de Cuba, where he served until September 30, 1911, when the position was abolished.
At the International Congress on Tuberculosis in Washington, in September, 1908, he acted as one of the interpreters.

On July 28, 1912, he was again appointed Acting Assistant Surgeon in the United States Public Health Service, but this time for duty at Havana, Cuba, attached to the American Consulate General.

Bubonic plague having developed in Havana, the United States declared a strict quarantine against that port. Surgeon R. H. von Ezdorf was sent to take charge, and as there was too much work for himself and his assistants, and he was allowed another assistant, he sent for Wilson, who had served under him in Santiago in 1901. The work consisted in inspecting passengers for the United States and inspecting, when necessary, and disinfecting vessels and their cargoes for the United States. There were three doctors, two disinfectors, one clerk, three inspectors and a launch, and all were worked to the limit from sunrise to sunset. This was entirely independent of the work of the Cuban Sanitary authorities, who carried on a vigorous campaign in the city and in the port. Fortunately, the first cases were discovered promptly and the disease did not spread, but all possible precautions were continued for several months. When confidence began to be re-established, the restrictions were gradually removed and the office force reduced.

On August 30, 1912, Surgeon von Ezdorf left for Washington, and Wilson was left in temporary charge; but von Ezdorf did not return, and on January 15th, Wilson was left in charge, his assistant having been discharged by the Surgeon General.

Although attached to the Consulate General, as Havana is a large city and there is a great deal of work, for convenience the United States Public Health Service had a separate officer near the water front. This is in the Lonja Building, Room 431, opposite the new San Francisco wharf, where the passengers embark and disembark.

In Santiago de Cuba there was leisure time for private practice, but in Havana this is impossible.

He was a member of the Philadelphia County Medical Society from 1893 to 1901. Before resigning from this society he joined the American Medical Association of which he was a member from 1902 until 1911, when, having left the U. S. Government service and not being a member of the County Medical Society, he was no longer eligible.

In 1905 he joined the Association of Military Surgeons of the United States, of which he is still a member.

He has been medical examiner for various life insurance companies, among these the Vermont Life Insurance Co., of which he was one of the examiners in 1897, in Philadelphia, and the Sun
Life Assurance Co. of Canada, appointed December 10, 1910, in Santiago de Cuba.

In Santiago de Cuba he was a member of the “Colegio Medico de Santiago de Cuba,” of the “Liga Antituberculosa de Oriente,” of the “Club Union,” and of the “Club Nautico,” of the last-named club, he was a member of the Board of Directors the last three years he was in Santiago.

Having served as physician to the Christian Brothers’ School, at Santiago de Cuba, for several years, when he left Santiago, in 1912, he was named a “benefactor” of the “Institute” at Lambecq-lez-Nal, Belgium, where this order has its headquarters.

On March 5, 1914, a case of bubonic plague appeared in Havana. Since then several other cases have appeared and the Health and Quarantine officers have been kept correspondingly busy. A local newspaper, “El Sol,” under date of April 16th, publishes a long article on this subject with a photograph of our class-mate and P. A. Surg. Creel on the first page.
The following communication was sent to every classmate whose address was known to your committee:

TWENTY-FIFTH REUNION OF '89 MEDICAL,
UNIVERSITY OF PENNSYLVANIA.

Name ........................................

Address ....................................

Dear Classmate:

1. Won't you make a determined effort to be present on Friday and Saturday, June 19th and 20th, our Twenty-fifth Anniversary?

2. Have you married since our Twentieth Reunion?

3. Are there any more children? Any grandchildren?

4. Have you specialized your work, or do you continue in general practice?

5. Have you given up the practice of medicine? If so, what do you do?

6. Do you hold any hospital appointments and any official positions, medical or otherwise?

7. Have you written any special articles or text-books since our last reunion?

8. Mention anything that has occurred during the last five years which is worthy of being recorded

9. What are your favorite hobbies?

10. Have you any suggestions to make as to how we can most enjoyably spend our Friday and Saturday together?

11. Any interesting side lights on our classmates which you think would assist our historian would be most welcome

12. Any photographs or souvenirs of our student days would be most gratefully received.

Please answer the above questions at once and return in enclosed envelopes to Dr. H. B. Carpenter, 1805 Spruce Street, Philadelphia.
SUMMARY.

At graduation we were certainly a Pennsylvania class, marshalling, as we did, 89 men from the Keystone State, out of a total of 124. To-day we have 68 men in Pennsylvania out of a total of, approximately, 100. Of this number 39 are in Philadelphia. The remainder are distributed as follows: Six in New York, four in New Jersey, two each in Colorado, District of Columbia, Illinois, Iowa, Virginia and Washington, one each in Brazil, Cuba, Delaware, Massachusetts, Michigan, Missouri, Nicaragua, Ohio and Switzerland. This distribution does not, however, mark the boundaries of their usefulness which has swept from Alaska to Africa and from Brazil to the Philippines. Wherever our men have been tried they have not been found wanting. At the bedside, on the operating table, in the routine work of the general practitioner, or the exacting labors of the various specialties, as well as the minute investigations in the laboratory, our men have been equally successful. Aside from their own inherent abilities they must owe a large part of their success to the inspiration they received from the noble and unusually brilliant Faculty it was their privilege to have for teachers.

It is worthy of record that five of our class have found their way into "Who's Who in America," namely, Benedict, McFarland, Posey, Rosenau and Stengel.

Since our last reunion six additional infants have been added to the nursery, making a total of 141 children up to date, and one grandchild.

Forty-four do general practice, of whom three limit their work to internal medicine. Five devote themselves to surgery namely: Banks, Boger, Crothers, M. B. Miller and Van Meter. Six continue to practice ophthalmology: Canby, J. T. Carpenter, Jones, La Motte, C. C. Moore, and Posey. Five confine themselves to ear, nose and throat work: Cleveland, Gallaher, Harris, Lederman and Tunis. Three do laboratory work; Kneass, McFarland, and Rosenau. Rawlings and Toulmin are life insurance specialists. Lear specializes in Biology; Stitt in tropical medicine. Benedict on diseases of the stomach, Davis on diseases of the skin, and Phillips as an alienist.

Of hobbies: while among the sixty odd replies to this question some fifteen men express no preference, the remainder open up
a wide field of interest from automobiles, bees, biographies and boxing to the study of toadstools. One man loves “antiques”; eleven autos, of which number one very appropriately adds the study of machinery. One classmate, emulating the example of the noble Roman matron declares for “children.” Four are devotees of farming. Two are for horses and an equal number for their backs. Two men widely separated in their spheres of usefulness, in the persons of Bacon and Baker, have an added bond of sympathy in the cultivation of flowers. One declares for Indian relics, one for historical research, one for surgery, another for “team work in operating and ‘up stream’ superiority in trout fly-fishing.” Golf claims only three; photography and yachting an equal number. Two generalize on “out-of-door sports.” One devotes his spare time to the manufacturing of photographic specialties while another devotes an equal amount of time to strenuous efforts “to appear younger.” One busy and successful specialist mentions: tennis, theatre and travelogues while another equally busy says: tennis, walking, bridge, biographies and sleeping. Another: entomology, bees and wasps and story writing. Canoeing, hunting, mountain climbing, fishing and quoits all have their advocates. One is honest enough to admit “dodging work” and another “resting.”

Three members of our Class occupy positions on the Boards of Health, in their respective localities. Twenty-five hold salaried positions, among this number; five are full Professors and five Clinical Lecturers. The hospital positions are both numerous and varied. Five admit that they have retired from active practice.

If the various books and pamphlets we have published could be collected together they would more than fill a five-foot shelf.

JOSEPH P. TUNIS, Historian.

WEISZGERBER, JOHN
WHALEY, BENTON H.
WILLIAMS, CHARLES BAEDER
THE DEATH ROLL

Death has claimed twenty-six of our number since graduation. Of these six died within the past five years. Unusual exposure in the course of duty, either directly or indirectly, caused the death of several of these men, notably: Brooke, Gillespie, Kulp, Leonard and Taylor. Had they been engaged in a less exacting vocation the majority of our departed classmates might have been alive to-day.

GREENE, WILLIAM C. (colored). Dr. Greene died of acute lobar pneumonia, after an illness of only two days, on December 14, 1911. He had returned to Philadelphia about three months before his death from Liberia, Africa, where he had been for five years. While in Philadelphia he had an office at Fortieth and Sansom Streets.

KULP, JOHN STEWART, son of George Brubaker Kulp, Esq., and Mary E. Stewart, was born at Wilkes-Barre, Pa., March 8, 1866, and died at Seattle, Wash., June 3, 1910. Educated at the Harry Hill Academy, Wilkes-Barre, from which he was graduated in 1884. He then entered the academic department of Yale University, and in 1886 the Medical Department of the University of Pennsylvania. After a post-graduate course there, he attended the University of Berlin, Germany, from which he received the degree of doctor of philosophy in 1892. On May 12, 1893 he was commissioned assistant surgeon and lieutenant in the U. S. Army, promoted in 1898 to captain and assistant surgeon, and in 1900 to major and surgeon of Volunteers. He was honorably discharged June 30, 1901, on account of disability incurred in the Philippine service.

On May 26, 1906, he was appointed major and surgeon in the permanent establishment and major of the Medical Corps. He was retired December 4, 1908.

One of his first military duties was a reindeer expedition into Alaska, where he was serving at an army post at the opening of the Spanish-American War. He served throughout the war, and in the Philippine campaign as surgeon of the Twenty-second Regiment, U. S. Infantry, and in the Ambulance Corps, First Division, Third Army Corps. He participated in General Wheaten’s expedition along the Passig and General Anthony’s advance in Mator,
etc. During this campaign he was talking with General Egbert when that officer was shot, falling dead in Major Kulp's arms. He participated in forty engagements without a wound.

After the Philippine insurrection Major Kulp was transferred to Manila and there planned Military Hospital No. 3. This hospital was considered the model hospital of the Spanish-American War. At the conclusion of the hostilities he was sent by the government on a trip around the world, to investigate the military hospitals of various countries and to report his observations to the War Department.

Retiring to Seattle, he was colonel and surgeon general of the National Guard of Washington. He also became Medical Director of the Public Schools of Seattle and surgeon for Chorygesor Camp, Spanish War Veterans. He was a member of the Arctic and Rainer Clubs of Seattle, the Society of Colonial Wars in California, the Military Order of Foreign Wars, the Society of the Army of the Philippines, the Pennsylvania Society of Sons of the Revolution and of other organizations.

He married Zoe Worthington Smith, of Philadelphia, on March 21, 1904. His widow alone survives him.

(This record was secured from the Annual Proceedings of the Pennsylvania Society of Sons of the Revolution, 1912-1913, page 44.)

LEONARD, CHARLES LESTER, A.B., A.M., M.D., died at Atlantic City, N. J., September 22, 1913, aged fifty-one years. Dr. Leonard held three degrees from the University, all received in course. He was of the Class of 1885, of the College Department, and was among the early experimenters with the Roentgen tube in its application to anatomy and diagnosis. Dr. Leonard’s death resulted from exposure to the rays, and he was a long-suffering martyr to science. He gave his life to humanity, that the alleviation of suffering and the prevention of disease might progress. Squamous epithelioma of the hand and arm, necessitating amputation, was the immediate cause of death.

As evidence of the esteem in which Leonard was held, let me quote from the Weekly Roster of May 9, 1914:

"Notice is given of a Leonard Memorial Social Meeting after the scientific meeting of the Philadelphia County Medical Society, at 10.30 P. M., on Wednesday, May 13, 1914.

"As is well known, the late Dr. Charles Lester Leonard was a martyr to the progress of scientific medicine. Some months before his death he originated the idea of having a series of social and refreshment nights to follow occasional shortened scientific programs by the County Society. To honor the memory of Dr. Leonard and his work, it is desired by some of those who feel that his thought for the social side of medical life should be car-
ried out that a beginning of such meetings should now be held. The first will therefore occur after the meeting on May 13th."

His widow and a daughter survive him.

ROTH, EMIL, born in Philadelphia, April 30, 1869. He received his preliminary education at the Harrison Grammer School. He practiced general medicine after graduation and was connected with the Stetson Hospital. About four years later he was in poor health for a time, developed lepto-meningitis and died, after an illness of some three weeks, on May 2, 1894. He never married.

SCOTT, J. ALISON, who was so ill at the time of our last reunion, died of a complication of diseases on August 13, 1909. Death was due to a systemic infection from sphenoidal sinusitis complicated by a mitral valvulitis. He was in his forty-fifth year. Words are inadequate to express the universal sorrow and regret that his many friends felt at the abrupt termination of so promising a career. A medical contemporary wrote: "Friend after friend recalled acts of unselfish service done at times when the need of friendship was great. Men devoted to the best interests of the profession told of his accurate and painstaking work in the field of original research, of his efficiency as a teacher, of his zeal for the maintenance of worthy standards of professional life and practice. Lovers of sport spoke of him as the ideal sportsman, who played a game for its own sake, hard and well, but took defeat with a contagious laugh that made everyone see the situation in its true perspective. Others declared that they had never met a more congenial companion in a social gathering of men, ready to join even in uproarious fun, to sing a taking song and to tell a capital story, and to do it within the bounds of the innocent and the clean."

A classmate and colleague wrote: "Those with whom he came in intimate relations, as classmates or colleagues, mourn the loss of a friend of absolute integrity, high ideals and rare talent; and his professional associates feel the keenest sorrow in the termination of a life of such eminent usefulness and accomplishment. Whether as a student, teacher, alumnus, or loyal son of the University, all who knew him would testify to his faithfulness, his unflagging interest in every good work, and his attractive personality."

The interest and devotion that so many felt found expression in several ways: as a recognition of what he had done for cricket in America his admirers along those lines subscribed for a handsome silver cup to be annually awarded under his name in the Inter-collegiate Association. His colleagues at the Pennsylvania
DR. J. ALISON SCOTT
For twenty years our faithful historian.
Hospital had his portrait painted and presented it to that institution with which he had been connected so long; while a committee of twenty-two of his friends raised an endowment fund of $10,000, to be known as the J. Alison Scott Memorial Fund for the promotion of research work in the Medical Department of the University of Pennsylvania. The principal of this fund is now over $11,000 and has been operative to the extent of $200 per annum for two years in assisting a research worker in the Pepper Laboratories. When it has reached somewhat larger proportions it will be turned over permanently to the University authorities. Dr. Scott is survived by a widow, Frances Pepper Scott, two sons and a daughter.

WEISZBERGER, JOHN. Born in Philadelphia, March 1, 1866. Late of 2803 North Front Street. Received his preliminary education at the public schools and in 1886 received the degree of Ph.B. from the University of Pennsylvania. He married Elizabeth Schmid and had three children, E. Leonard, Ford L., and Louis. His wife died prior to 1906.

After graduating in medicine he became a general practitioner, serving also as Police Surgeon and as School Director in Philadelphia. He died June 23, 1909, after a lingering illness from phthisis pulmonalis.

His eldest son, E. Leonard, is a druggist, Ford L. is in the U. S. Navy, and Louis graduated from the Northeast Manual Training School of Philadelphia in June, 1911.

WILLIAMS, CHARLES BAEDER, continued in the position of Assistant Physician to the Pennsylvania Hospital for the Insane until January, 1911, when he was stricken with appendicitis. Although an operation was performed, he died from that disease on January 10, 1911, in the forty-sixth year of his age. Among other resolutions adopted by his College Class of '86, shortly after his untimely death, was the following:

"That, as a Class, we shall especially miss his never-failing interest and support in all matters pertaining to us, and that this loss will be most keenly felt at our approaching twenty-fifth anniversary. That while we recognize the fact that Dr. Williams was a skillful physician, and that during the later years of his life his devotion to his profession brought comfort and health to many, nevertheless it was as the faithful friend that we knew him best. His cheerful, gracious and helpful presence will therefore always remain a treasured memory to those of us who were fortunate enough to have known him at the University of Pennsylvania and in after life."

During his entire term of residency he devoted himself so closely to his work that he rarely left the hospital except to go to
the home of his parents some few squares distant, at Forty-second and Walnut Streets. He was devoted to the care of the insane and was much beloved not only by his patients but by all his fellow workers in the hospital.
